SWIMMING POOL FOR SQUAMISH?

Representatives of several Squamish organizations attended a meeting last week to discuss the possibilities of a swimming pool for Squamish.

Various pools, sizes and costs were discussed as well as the suitable sites. Those present agreed it was a project which must be supported by the entire community and was too large for any one organization to handle.

The delegates decided to report to their organizations and as soon as more complete details on costs, etc., could be secured a public meeting for all those interested in the project will be held. It is hoped to have a pool architect, an engineer and a representative from the Britannia Beach community club present at this meeting to explain the project and answer questions.

CORONATION DAY CELEBRATION SCORES

Squamish and Howe Sound District Board of Trade at their regular meeting last week, heard a report on the successful Coronation day celebration.

Roads, bridges and streets were the main topics discussed at the meeting. The board condemned the disgraceful condition of the main streets in Squamish and decided to ask the Village Council to enforce the by-laws regarding this condition.

In letters from the Public Works department they were advised that the use of crude oil as a dust preventative on local roads was being considered, and that repairs will be made to the red bridge this summer. The PWD is also consulting the Indian Department regarding the S-turn near Brackendale.

The Garibaldi Park committee reported that \$3,000 has been appropriated from the contingency fund to renew two of the bridges on the road to Base Camp.

\$27,000?

\$100,000?

\$1,600,000?

How much does a wildcat cost?

A "wildcat" is a well drilled in an area where oil has never been found. Drilling costs vary, but the average wildcat in western Canada runs to more than \$100,000. One well cost \$1,600,000—and found no oil!

Oil is making an increasingly important contribution to our standard of living. How many of these questions about it can you answer?

How many wildcat wells find a new oil field—
1 in 3? 1 in 7? 1 in 23?

Since 1939 the cost of living index has risen by 85%. During that time has the price you pay for gasoline gone up by—
44%? 79%? 103%?

A lot of oil has been discovered in the west since 1946. In that time have Canada's oil reserves increased—
4 times? 23 times? 37 times?

How many companies, would you say, are engaged in the oil business in Canada—
23? 174? 750?

Canada's growing oil industry means orders for many businesses, jobs for many Canadians. Last year Imperial's purchasing department bought equipment and supplies from Canadian firms amounting to—

\$12 millions? \$56 millions? \$110 millions?

The long-term average in western Canada is 1 in 23. Only 1 in 87 has found a field capable of producing as much as 2,000 barrels a day.

The average retail price of gasoline is only 44% higher than prewar, even with higher road taxes in all provinces.

Reserves have increased 23-fold in the past six years. Canadian fields now supply all the prairies and part of B.C. and Ontario.

About 750 companies in which the public has an investment interest, as well as several hundred private firms and partnerships. And this doesn't include the thousands of privately operated service stations and other retail and wholesale outlets for oil products.

\$56 millions. About 4,500 Canadian companies sold Imperial supplies ranging from heavy steel plates to paper clips.
