PEMBERTON VALLEY and MOUNT CURRIE

Vol. 8, No. 9 — SQUAMISH, B.C. — THURSDAY, MARCH 5, 1964 — 10 Cents Per Copy

Kiernan revises program

SQUAMISH is one of the few towns in B.C. which is fortunate enough to have the community swimming pool located so close to the schools that it can be used for Physical Education classes during several months of the year.

RELAY STATION FOR SQUAMISH

A recent announcement in Ottawa that the CBC has announced plans for low power radio stations at Squamish and Christina Lake, has aroused hopes for improved radio reception in the valley.

Reports indicate that the station will be in the nature of a relay or booster station to improve radio reception in the Valley. At present radios are useless in some areas, particularly those close to the power lines which divide the valley.

It is possible that the station, which will likely be built on the mountains either near Woodfibre or Watts Point, could be used for AM, or FM radio, or maybe even for TV.

Laundry first

Tenants sign up for shop centre

KingKoin Laundry has signed up as the first tenant for the Garibaldi Estates shopping centre which will be built this year. Other major tenants under negotiation are a bank, supermarket, drug store, medical block and restaurant block.

Pat Goode, of Garibaldi Park Estates Ltd., says that Walter Goss Const. has completed the first stages of clearing and gravelling. He said that negotiations are completed for the sale of property for the construction of a 20 suite apartment block. Negotiations are also underway and almost finalized with one of the major oil companies for a service station and truck repair depot at the entrance of the Estates. Work on this should start this month.

Contract for the installation of the sewer in the VLA project and the extension of Ayr Drive has been awarded to H B Contractors from North Surrey.

Mr. Goode also said that W. Goss Contracting has been given the contract for clearing the roads for the next hundred lots in Garibaldi Highlands, which will be on the extension of Skyline Drive.

"In all, there are now 88 homes within the Estates, Highlands and VLA project," he said.

IWA will ask for wage hike

The IWA will ask for a 40-cent an hour wage increase for the 29,000 coast workers when negotiations start next month with the B.C. Forest industry.

Other proposals include: an increased differential for highly qualified tradesmen. This will be an additional 30 cents an hour over and above the 40 cent raise.

Double time for all overtimes instead of the present time and a half.

An extra week's vacation for everyone. At present workers get two weeks after one year, three weeks after five years and four weeks after 20 years service.

The present contract ends on June 15th. This was negotiated two years ago and the workers received a 16 cent an hour increase. Many union members considered it inadequate although it was approved by a majority of four thousand members.

Engineers inspect river

Government engineers and local residents made a thorough inspection of the Squamish River in the vicinity of Judd's slough and the Big Chief Drive-In last Wednesday.

T. A. Leach, assistant chief engineer from the B. C. Department of Lands, Forests and Water Resources, with R. G. Fernyhough, assitant engineer; R. E. Street and E. Axen, took a forestry boat and crossed the river to Stoney Creek where they made a thorough inspection of the river banks and log jams.

The purpose of the trip was to attempt to determine what temporary work could be dont to alleviate the possibility of flood danger this spring within the boundaries of the limited amount of money available for the work.

On Saturday of last week G. M. Behrner and D. Magee accompanied government engineers across the Squamish River to the log jam which is blocking the westerly channel of the Squamish River near the Big Chief Drive-in.

The engineers were advised that it was not considered practical to try to burn the jam, but the best method of removal would be to use cats and perhaps a donkey to remove the jam to get some water to go down the former channel and relieve the pressure on the river bank by the highway.

Mr. Behrner said that the matter is under discussion.

In timber industry

Urges curbs on bidding

The so called "Harrison Group" representing seven associations whose members control the bulk of lumber production in the province last week urged the legislature's standing committee on forestry to restrict bidding on crown timber to established operators.

In the group are the B.C. Loggers' Association, Interior Lumber Manufacturers' Association, Independent Timber Converters' Association, the Truck Loggers' Association, the Northern Interior Lumbermen's Association, Cariboo-PGE Lumber Manufacturers' Association, and Independent Squamish Logging Operators Ltd. The group was set up last year after the standing committee asked the industry to come up with a recommendation on irresponsible bidding practices.

The group proposed that Lands and Forests Minister Williston should continue to exercise his power to disallow timber sales bid above the appraised or upset price. They also suggested that bidding in any fully committed crown forest should be restricted to current quota holders who would have the right to match the highest bid.

It was argued that these measures would give the industry the degree of stability it needed to finance new logging and milling equipment under competitive conditions.

The value of quotas and the right to bid were the source of considerable arguments between the committee members and the spokesmen for the industry.

Some of the arguments advanced by the operators were that: restrictions were necessary to protect operators from bad bidding; they needed the ministerial discretion clause to protect themselves from each other; only a fraction of the sales were bid up; the proposed restrictions might increase bidding between established operators. Some of these arguments are contradictory.

Distributing quotas in new crown forests opened up by the Forest Service was another contentious issue. The group was asked how the quota holders would be picked.

Some committee members suggested that restricted bidding would build a protective fence around established operators in crown forests, but spokesmen for the industry felt that this would help to solve some of the problems in a large part of the industry although it would not answer all the province's timber problems.

DON HARDACRE HEADS TRADE BOARD

Don Hardacre was elected president of the Pemberton Board of Trade at its annual meeting last month. John Cosulich is vice president, with Dick Webb, secretary, and Fred Meen was re-elected treasurer.

Members of the council are past president J. Graham, F. Collister, S. Kelly, J. Moore, E. Rivett, R. A. E. Taylor, R. H. E. Taylor and B. Vaughn-Jones.

Next step in river control

The following letter from Jack Davis, M.P., to E. Axen might be of interest to those who are working for some form of control of the Squamish River.

"As the federal government is prepared, and indeed committed to participate in river and other water redevelopment programs, assistance in the Squamish area could be readily forthcoming . . .

"The biggest hurdle, after local interest has been aroused, is usually that of getting the provincial government to play its part in such a program. However, as the B.C. government has now begun to take an interest in respect to water development in North Vancouver, the road may be easier in so far as protective measures on the Squamish are concerned.

"Mr. Williston is now much more conversant with this type of assistance than was the case a year ago. He should perhaps be your next point of contact after your local organization has decided whether to proceed or not along the lines which I have been suggesting in recent months."

* * *

ED NOTE: The federal assistance which Mr. Davis refers to is in straightening out the Squamish River in order to put it back in its original channel along the mountains at the west side of the valley.

This would be a permanent solution to the river problem which will become even more acute as logging in the upper reaches of the Squamish River increases.

Tight restrictions for park use

Recreation Minister Kiernan said last week that legislation will be enacted within the next year to regulate industrial activity in provincial parks.

He said that the proposed act will control all activity in parks, protect wilderness and repreational areas, provide new park boundaries and set up a strict building code.

The minister promised that popular areas like the Black Tusk section of Garibaldi Park would be protected no matter what minerals were found in it. He also said that there would be no industrial activity in any park smaller than 5000 acres.

Some parks might be increased in size and boundaries of others might be changed. Remote timbered areas might be exchanged for land that would be more accessible for park use.

He said that some of his recent remarks in the house about industrial activity in parks were made to generate public opinion. He added that he had certainly succeeded in this.

He also stipulated that private development should be restricted to areas around the outside of the parks. He said that the government is continually acquiring park land and has 1700 park reserves now. These will be investigated and turned over to other uses if not suitable for recreation.

The minister's suggestion has caused considerable controversy in Squamish, varying from those who do not want to see any changes in parks, particularly Garibaldi Park in which the community is especially interested, to those who would like to see it opened for logging.

The Chamber of Commerce took the stand that it would be best to wait and see just what the proposals for development of Garibaldi would be before taking a stand on the matter.

Some people felt that any industrial development of the park would be just the beginning of the encroachment upon the areas now set aside for that industry, once it entered the park, would be difficult to control and difficult to stop. recreational purposes. They felt

Some local businessmen, not loggers incidentally, felt that selective logging such as that done in Stanley Park after Hurricane Freda struck, might be beneficial. Some local loggers felt they should be able to log within the present park boundaries and one even offered to build a road in to Diamond Head if he was given the timber along the road.

Another logger advanced the opinion that, as far as he knew the boundaries of the park had been changed three times within the past few years, and he suggested that everything up to 4000 feet elevation be logged.

Anything above that was really not merchantable timber and this would not affect the meadows, lakes or flowers.

An opponent to the idea of logging in parks suggested that, if there is such a shortage of timber in B.C. that logs must be taken from parks, it might be a good idea if the government changed its mind about Tree Farm Licences, as these would provide a great deal more timber for the small logger than the 6¾ million acres of park land, much of which is of little value to the logging industry.

Mining seemed to have even more opponents than logging. Apart from one or two people who thought a mine would create jobs, practically everyone felt that mines are even more likely to deface the appearance of a park than logging.

Local businessman and former logger G. M. Behrner, who has long been interested in Garibaldi Park and is perhaps one of the best people to give an opinion on the question of logging and mining in park areas, has expressed the fol-

EDITOR WILL ATTEND SEMINAR

Times editor, Rose Tatlow, has been invited to attend the seminar at the University of British Columbia next Monday afternoon at which the four preliminary plans of the UBC graduate study class in community planning for the Squamish Valley will be presented.

The plans, which are the result of two months work, will later be condensed into one master plan for the Squamish area. Sixteen students in the class have been working on the project since January.

A scale model of the valley will also be featured at this seminar.

New post office opened

The new post office in Garibaldi Estates opened for business on Wednesday morning, Feb. 26th. Mrs. Dolores Werger is the postmistress.

Located on Tantalus Way, the post office has 179 outside boxes and mail can be picked up at any time of the day or night. It will serve the Mamjam area and it is estimated that there are at least one hundred homes in the district.

Fred Widnall from the district post office in Vancouver, and Harvey Hurren, postmaster at Squamish, assisted Mrs. Werger in preparing for the first day's business. Also present were Mr. and Mrs. P. Goode and Mrs. Bobbie Heubner of Vancouver.

Hours for the new post office will be from 9 a.m. to 11 a.m. and from 3:30 p.m. to 5:30 p.m. Monday to Friday, and from 9 a.m. to 11 a.m. on Saturday morning.

Fire destroys trailer

A flash fire completely consumed the interior and contents of the big trailer that was recently moved in along the trail on the Mimaty Bay side of the gravel pit.

The trailer, owned by Mr. and Mrs. Jack Arason, was a total loss. Mr. Arason is diamond drill foreman at the mine. They have two little girls, Cindy and Brenda, and are now living in Vancouver.

Shopping is more successful and satisfying when you start in The Times before you visit the stores.

Parking problems interest council

Parking problems were the chief concern of the municipal council at its meeting last week.

Discussion arose regarding the amount of space required at the rear of a business building for employees' parking. It was pointed out that approximately 20 feet would be sufficient to permit a car to be parked without interfering with the normal flow of traffic through lanes.

The works foreman, F. Wilson, was instructed to find out how many feet would be required for this purpose and council decided to amend the bylaw covering parking at rear of business premises accordingly.

A report from Mr. Wilson also mentioned the problem of trucks and delivery vehicles, parking in lanes for long periods of time and thus making it difficult to use these lanes. The lane between Cleveland Avenue and Second Street from Pemberton Road to Victoria Street was the one in which most of these offences occurred. He pointed out that this was not allowed.

Letters were to be sent to stores who have trucks making deliveries at the rear entrances and blocking lanes, asking that this be discontinued.

Commissioner L. C. Kindree and works foreman Wilson were instructed to check the park site on which the curling rink is being built and determine how much ground will be needed for the possible future construction of a skating rink before council will agree to permitting any of this area to be added to the Stawamus school playground.

Miss Magee here from India

While on furlough from her duties as a missionary in India Miss Edith Magee has been spending as much time as possible with her mother, Mrs. Iona Magee.

The visitor is in great demand throughout B.C. as a speaker. Her many years in the missionary field have made her an authority in this work and the slides used to illustrate her lectures are an added attraction.

Miss Magee has made one brief visit to the Squamish United Church and it is to be hoped that her busy schedule will permit her to speak once more before she returns to India.

LEGION PRESIDENT J. Jowsey, left, officers of Squamish Branch No. 115, Mrs. K. H. Wells, provincial representative, Vancouver district and J. O. Lake, past zone commander, who installed the Royal Canadian Legion, and Mrs. Doreen Shaw, president of the Ladies Auxiliary to the Legion.

Vol. 8, No. 9 SQUAMISH, B.C. — THURSDAY, MARCH 5, 1964

Education Isn't Just Schooling . . .

As this is Education Week, it seems to be a fitting time to write something about the subject. We aren't experts but perhaps the few ideas that follow may be of interest.

Education isn't just schooling. That seems to be a fairly definite statement. We don't think education stops at the high school or university level, or at whatever point a formal school takes one. We firmly believe that everyone keeps on learning all their lives unless they refuse to admit that anything new can be absorbed. And even the most dogmatic find that some of their ideas can change, and this is a form of education.

We would be inclined to say that formal schooling is just the ground work of education. It is the framework on which one builds the knowledge which is acquired later in life. Another description would be to say that it is the basic learning, the education one receives after leaving school is all related to that basic knowledge.

There are so many new things to learn, subjects which were not even taught when we went to school, skills which were unknown and sciences which had only been dreamed of. All these offer an exciting challenge to all of us, whether we have just finished high school or whether it has been forty years since we last saw a classroom.

We are all concerned with educating ourselves to earn a living. This is necessary. But it should not end there. We can acquire sufficient knowledge to earn our food and comfortable surroundings. But there is more to life than just eating, sleeping and comfort. Man has been given a mind, and the ability to use that mind. It should be used. If not, like everything that is left idle, it will stagnate.

Hours of work are becoming shorter and we have more leisure than our parents enjoyed. It is up to us to spend them wisely, not just in looking after our creature comforts, but in learning new skills, new hobbies, in reading and studying the world around us. There is so much to learn that a lifetime is all too short.

Each of us should consider Education Week the time to evaluate our progress in broadening our field of knowledge. How many new books have we read? Have we acquired a new skill? Or learned something about another form of art?

It's not difficult to do this. All it takes is a little time and the wish to know a little more about some subject which we find interesting. Everyone is interested in something. Follow that interest and you will find that education doesn't end when you leave school. You will even find that you enjoy it!

Vandalism At Its Worst . . .

We have always considered vandalism a senseless sort of thing, and when it is coupled with deliberate cruelty it becomes something both criminal and dangerous.

Usually it takes the guise of wanton destruction and wilful damage but we have heard reports of a more serious type of vandalism which occurred here recently.

Apparently a local horsewoman found that during the night someone had entered the barn where her animals were kept and placed broken beer bottles in the stalls, broken glass from these bottles in the hay and also in the oats which she normally fed to her horses.

In addition two of the animals, one in foal, were turned loose and during the night, fought with each other, kicking and biting. As a result, one of them may lose her foal.

All this occurred between midnight, when she had last checked her animals, and aproximately six in the morning, when she went out to the barn.

We would be inclined to say that this was the work of adults or young people who were almost adult as one would not expect a child to be out at that hour of the night. But no matter who the culprit was, the act itself was cruel and malicious.

We find it almost impossible to believe that anyone in Squamish or the valley could be capable of such an act. It was deliberately calculated to hurt the owner by striking at her through the animals she loved.

We certainly hope that the offender or offenders will be caught and are quite sure that everyone in the district will agree with us. Such behaviour does not belong in our community.

Town Planning Important . . .

With the immediate possibility of the construction of a chemical plant in Squamish and the repeated rumors that a pulp mill may also come to the valley, it is very important to decide just what course future development of the Squamish area may take.

One thing that should be given the highest priority is town planning. Only in our case it should be applied to the valley as a whole. Two attractive subdivisions, one in Valleycliffe within the village limits, and the other in Garibaldi Estates and the VLA project a short distance north, are now being developed.

Fortunately they are both being planned properly, with sufficient commercial and park areas provided for the residential buildings. In the case of Valleycliffe, future schools are also being planned.

However, in the portion of the district outside the village, there is no control over future development. There is nothing to stop a glue factory, for instance, from coming into the valley and locating close to the choicest piece of residential property.

Planning should envisage the whole valley, with zoning included so that the equity of existing and future property owners will be protected. Industrial and commercial area will be planned to encourage diversity of the local economy. It should also include reservations for recreation areas, and if necessary, additional school sites.

Squamish is fortunate that the Community and Regional Planning class of the Faculty of Graduate Studies at UBC is making Squamish the subject of their main project this year, and they are planning for the development of the valley as a whole.

Whether we can use the suggestions they make, or not, there is definitely a need to plan for the growth of the area and the utilization of all possible land in the district.

Now Let's Fix The Highway . . .

No one will be sorry to see the old Red Bridge disappear. This transportation bottleneck was bad enough when Squamish was an isolated community but once the highway to Vancouver was completed it was utterly inadequate to handle the ensuing traffic.

Without appearing ungrateful for the blessing of a new bridge this paper would like to point out that this is only a small step in the overall highway improvement.

The eight miles of road linking Squamish and Britannia is dangerous, narrow and inadequate to handle the traffic which uses it, particularly in the summer months. In the winter the steep hills and sharp curves are dangerous when ice and snow conditions occur.

Last summer our MLA Don Robinson announced, and we printed it in the August 15th issue of the Squamish Times, that work would start on the relocation and the reconstruction of these eight miles as soon as the summer traffic eased.

It is almost spring now and just about the beginning of another summer tourist season and apart from some activity by surveyors we are still no nearer to improvement of the highway than we were last summer.

Surely if the road is to be relocated, and we think it should be, this should be done as soon as possible in order to avoid the difficulties of construction while tourist traffic is at its height. Now that the road is good as far as Garibaldi and can be driven over as far as Alta Lake increased traffic can be expected along the Vancouver-Squamish highway.

Reports indicate that this new gravel road was very popular last summer and fall and it will be used even more this summer. Campers, fishermen and hunters as well as the many people who are buying or leasing property in the vicinity of the road will be driving to Squamish and we predict 1964 will be a record year for highway travel in this area.

The improvement of the Squamish-Britannia link, with its steep hills, sharp corners and narrow road surface with patched and crumbling blacktopping is long overdue and we hope that it will not be put off for another year.

PTA SPRING FAIR AT BRITANNIA

The Britannia Beach PTA will hold its annual Spring Fair on Tuesday, March 10th at 6:30 p.m. in the school auditorium.

Home baking, aprons, white elephants, a fish pond, bingo, and other games will be featured. Come and bring your whole family, there will be something for everyone.

This is the only money raising project held by the PTA each year and your support is earnestly requested.

Letters to the Editor

EXTENSION OF OCEANVIEW HIGHWAY BRITANNIA - SQUAMISH

Hon. P. A. Gaglardi,
Minister of Highways,
Province of British Columbia,
Parliament Buildings,
Victoria, B.C.

Dear Sir:

May we respectfully urge you, Mr. Gaglardi, to give immediate consideration to bring that section of the Oceanview Highway between Britannia and Squamish, to main highway standards, similar to that between Horseshoe Bay and Britannia.

When you opened the Highway in August, 1958, you headed a large cavalcade of people interested in the future of the area in many ways. At that time, Mr. Gaglardi, there were no industries operating in a major way. Since 1958 the Woodfibre mill has been completely modernized and now a further $21,000,000 expansion is underway. The Britannia mine has re-opened and a major exploration program is being undertaken. The sawmill, under the Forest Management Program, opened in January, 1963, a second major logging operation is now commencing in the Mamquam Villey.

All these changes in the industrial pattern have resulted in a major alteration in employment in the area and the use by the employees of the new highway. The Provincial Highway Department has done an outstanding job of maintaining and improving the present road, which was originally built about 1933 as a relief project. The capacity of the present road has been reached as regards to the commuting of employees to and from the Squamish area and the movement of industrial supplies and products. The road is dangerous and the possibility of casualties is ever present and increasing.

The extension of the highway from Alice Lake to Alta Lake is nearing completion and will be in use this summer. The Garibaldi Olympic Development Association is drawing attention to the Garibaldi Park as a ski and general tourist area and propose the development of the Whistler Mountain ski slopes. The further extension of the highway on to the Pemberton Valley has now started.

The present capacity of the Britannia to Squamish Highway is now fully taxed over part of the year due to the tourist flow. It is felt that with the opening of the Alta Lake section shortly, the capacity of the road will be completely overtaxed.

The group of industries mentioned previously has invested very large sums in the area to provide employment and development of the area. It is essential for their efficient operation to have the uninterrupted flow and movement of products, materials and supplies and quick access for employees commuting to their homes.

We would appreciate your immediate consideration being given to this request. We should appreciate an opportunity to discuss this with you personally if it is desired.

Yours truly,
The Association of Howe Sound Industries.
Regional Development Committee.
P. N. Goode, C.A.
Secretary.

TRAILER OWNER COMMENTS

Editor, Squamish Times:

As a trailer owner permit me to comment on your editorial, "Trailers a Community Problem."

I'll agree that proper parks and layout facilities should be maintatined for trailers in order that same will not clutter up a well organized community.

However, I can not agree to your statement that these owners and trailer tenants should pay school taxes over and above what they pay for rent or as ground rent.

Some courts pay as high as $40 for rent and surely the tax monies are coming out of this.

By the same token you would not suggest that a tenant who is paying upwards of $200 a month is not a taxpayer.

Trailers as you state are a convenience to some workers and at the same time it gives a trailer owner an opportunity to get some of his rent back as equity in a home of his own.

By instigating a tax of this nature on people who are more than paying their own share for what they are getting would be just adding another burden on people who can ill afford it.

T. S. NORE.

Editor, Squamish Times:

I would like to take a few minutes of your time and your readers to clear up a misunderstanding you have in regard to trailers and the community problem they create regarding school expansion and taxes.

In October the provincial assessor discussed this problem of school taxes with me and I agreed with him that trailers should pay school taxes, but his proposed method of collection was not the most accurate system. I suggested to him as I did in 1962 that all trailers be required to purchase and display a licence plate. This revenue was to be earmarked for school expansion in rural areas where expansion is necessary due to trailer population. My suggestion would require a separate bureau be setup, and was ruled out.

The easiest way was to tax the land owner. Consequently all trailers in the valley residing here in October have been assessed to the land owner. My assessment on trailers and their improvements jumped very near $10,000.

How much school tax this district will receive from trailer assessments I do not know, but the tax has been made and it will be up to the local school board and the municipal district to demand their share of it.

When I explained the necessity of charging my tenants school tax there were no objections.

R. E. JORDAN.

* * *

ED. NOTE: Mr. Jordan is correct. The land owner is taxed, but this is not specifically for school purposes. Technically he cannot charge anyone school tax, even his tenants. But he can raise his rents accordingly.

Even if the land owner is taxed, we would say that the assessment is small compared to the value of the trailers which may be parked on his property.

Furthermore it is our understanding that a trailer must be classed as permanent before the charge is levied on the property owner.

L. C. Minchin heads public library board

L. C. Minchin was elected chairman of the Board of the Squamish Public Library at the first meeting last week. Mrs. C. Tatlow was re-elected secretary-treasurer and Mrs. F. Clarke is again the librarian.

The board was pleased to hear that the Lions Ladies were planning to make a donation towards the purchase of a card catalogue cabinet for the library.

The annual "Open House" will be held in April, on the Saturday of Library Week and it is hoped that exhibits from the "painting for pleasure" and the "arts and crafts" classes of the night school will be able to be displayed.

Mrs. Johns suggested that as practically all of the board members are new to library business it might be helpful if leaflets outlining the duties of small public library boards be obtained and studied.

Alta Lake Ripples

During the past two weeks many of the cabin owners have visited the lake and brought guests with them. Among those noticed here are: Don and Dot Noyes with week-end guests Don and Nancy Cadenhead with their three children, Lynn, Allan and Judy.

Noticed that Steve Blasko, Les Doherty and Bill Green are at VanWest logging camp overhauling equipment.

Recent guests at Glen Creelman's home were Gale Alder of Vancouver and Mr. and Mrs. George Miles of Squamish with their children Karen and Stephen.

Bill Hamer had week-end guests from Vancouver, Barry and Marlene Hillhouse, Ellen Love and Adeline Price.

New officers for hospital W.A.

Mrs. P. Russell was elected as president of the Women's Auxiliary to the Squamish General Hospital at the annual meeting when the new slate of officers was chosen.

Mrs. D. Barnfield was named first vice-president, with Mrs. J. Phillips as second vice-president, Mrs. J. Tinney, secretary and Mrs. E. Stathers, treasurer.

Mrs. G. Behrner, retiring president, reported on the successful year. Among the projects of the group was the purchase of a humidity tent, patient walker, four stainless steel cribs and two overbed tables. A plaque in memory of Mrs. Vi Clarke was placed on the baby booth in the hospital lobby.

Weekly visits were made by members to hospital patients.

A most successful sale of TB seals was reported by Mrs. Gedge.

The group's next project is to purchase ten bedside tables.

There will also be a bake sale and variety table with draw for a crocheted table centre and cake on March 20. Mrs. Behrner thanked the members for their support in the past.

The W. A. also welcomed visiting members of the second W. A., pledging their support and expressing the hope that new ideas for assisting the hospital patients will spring from their enthusiasm.

Three buildings underway

The vicinity of Armstrong's corner on Government Road is a hive of acitivity these days with an apartment building, garage and teacherage all under construction nearby.

The eight suite apartment block is under construction on the corner of Government Road and the one leading to Diamond Head. The concrete block exterior is almost completed and work is proceeding on the plumbing and heating installations.

A short distance up the road the new teacherage at Mamquam school is rising rapidly. The existing teacherage will be moved across the road to the same property in order to provide more playground space.

Further north the framework of Ian Hamilton's new garage is now almost completed and the building is beginning to take shape.

SCOUT & CUB NEWS

by Hector Le Bleu and Alma Hill

Second Squamish Cub Pack had a wonderful parent and son banquet. Guests attending were Ted and Alma Hill, and Mr. and Mrs. John Powell.

An exceptionally good time was had by both Cubs and parents. On Saturday Feb. 29th, the Cubs tried their luck at bowling.

* * *

First Squamish Cub and Scout Banquet was held on Feb. 24th with 78 people attending. Guests were Mr. and Mrs. John Powell, Mr. and Mrs. W. J. Elliott, and Mr. and Mrs. F. Van Elk. A presentation of Chaplain's pin and clock was given to Rev. N. Penrose for his years of service and assistance in the Scouting service. Mrs. Alma Hill was presented with her Gilwell Beads, Neckkerchief and woggle by District Commissioner John Powell. This is the only Gilwell held by a leader in the East Howe Sound District. Mr. T. H. Le Bleu and Mr. R. Mallett were invested as Scouters by the District Commissioner.

* * *

Scout-O-Rama will be held at the West Vancouver High School April 11th and at the John Oliver High School April 16th. Adults $1.25 and children under sixteen $1.00. Come one, come all for a wonderful time.

New guides enrolled

Monday, February 24, was enrollment night for six girls of the 1st Mamquam Girl Guide Company. District Commissioner Clubb heard the girls say their Guide Promise and then welcomed them into the Movement.

Those enrolled were Darlene Brede, Carolyn Schutz, Wendy Sellars, Jane Carrico, Barbara Petruschak and Debbie Harris.

Captain J. MacDonald repeated the Guide Laws as she lit ten gold candles and passed them around to the Guides in horseshoe formation.

The highlight of the evening was a play put on by one of the parols, for the parents. Refreshments were served after one or two vigorous action songs.

Scout campsite wanted here

East Howe Sound District Council was told at its regular meeting last Wednesday evening that there was a possibility a campsite for the local Scouts could be secured in this area. Chairman W. J. Elliott, L. Cartwright, R. E. Street and D.C. J. Powell were appointed to look into the matter.

Mrs. Ted Hill was appointed District Cubmaster, replacing E. Thiessen, who resigned a few months ago. Mrs. Hill is also the cubmaster for 1st Squamish, but will resign that position as soon as a trained replacement can be found.

District Commissioner J. Powell reported that he had attended both the 1st and 2nd Squamish parents banquet and had enjoyed them very much. At the 1st Squamish dinner, he invested the new Scoutmaster, Hector Le Bleu, and his assistant, Ron Mallett.

Rev. N. R. Penrose was presented with his "chaplain's pin" for his service to Scouts and Cubs and Mrs. Hill received her Gilwell beads and neckkerchief.

Col. G. Smart, Regional Commissioner for Vancouver District, officiated at the installation of the chairman, W. J. Elliott; secretary, L. Cartwright; District Commissioner, John Powell, and Camp Committee chairman, R. E. Street.

FISHING CONTEST

Fisherman are going to have a chance to let everyone know about the big one that they caught (the one that didn't get away) during the next two months if they register their catch in the competition being sponsored by Frank Fields of the Cheekye Dog House.

A prize of a set of carvers and steak knives will be awarded to the angler who catches the biggest steelhead between the first of March and the 30 of April.

First entries in the contest for the largest steelhead caught in the Cheakamus River were the 10 pounder caught by Bill Barden of Vancouver, and the 16 pounder caught the same day by another Vancouver fisherman.

Babies christened

The infant sons of Mr. and Mrs. Keith Hendrickson and Mr. and Mrs. Richard Munro received the rites of infant baptism at the Squamish United Church during the morning service on Sunday, February 23, with Rev. Norman Penrose officiating.

David Keith were the names bestowed upon the two month old son of Mr. and Mrs. Keith Hendrickson. Sponsors for the baby were Mr. and Mrs. Harry Moser of North Vancouver.

Following the ceremony a family gathering was held at the home of the infant's parents. In addition to Mr. and Mrs. Moser and their daughter Helen, out of town guests included Mr. and Mrs. C. Pollitt of Coquitlam and Mrs. E. A. Edwards who is baby David's paternal great grandmother.

The three month old son of Mr. and Mrs. Richard Munro received the names Kenneth Alex, with Mr. and Mrs. Harold Johnson of North Vancouver acting as his gorparents. A family luncheon was held at the home of the baby's parents immediately after the service.

JACK DAVIS

Ottawa Diary

The recent speech from the Throne was shorter than usual, perhaps the shortest on record.

It, nevertheless, packed in a good deal of legislation. Some of the issues are new. Others, carried over from the last Session, are also bound to be controversial.

Some of these measures are, in effect, unfinished business. The Columbia River Treaty, for instance, has to be approved by Parliament. Representation by population remains to be put into effect. And the government has every intention of pressing on with its portable, wage-related old age pension plan. Each of these subjects, though they have the approval of most Members of Parliament, may nevertheless be debated for days at a time.

* * *

Then there are the new measures designed to implement the recommendations of various Royal Commissions. The MacPherson Royal Commission recommended the streamlining of our existing railway system. Railway line abandonment, especially on the prairies, is therefore likley to result from the legislation which will be passed this Spring with a view to improving Canada's railway services.

Another significant item is the establishment of a separate Minister to be known as the President of the Treasury Board.

The Honourable George McIlraith, after its passage, will be responsible for carrying out the economy measures recommended by the Glassco Commission — the Commission which pinpointed numerous wasteful practices in the Civil Service

* * *

In addition to strengthening the position of the Canadian magazine industry (a recommendation of the O'Leary Commission) there were some outright surprises. The most notable was a plan for loans to university students, interest free during their years of study.

Another was a major amendment to the National Housing Act which will permit the granting of mortgages on existing houses in slum or redevelopment areas.

There is also going to be legislation limiting election campaign expenditures; a system of minimum wages, maximum hours and statutory holidays for workers under federal jurisdiction; and a proposal to limit the age of Senators to, say, seventy-five

Most of this legislation will be on the Statute Books by the end of July. So may a Bill to reorganize the near bankrupt Unemployment Insurance Fund.

However, this much is certain, the present Session will be both lively and interesting. We are, in other words, well launched into what should be a constructive and fruitful Session here in Ottawa.

KATHY SMITH FETED AT BRIDAL SHOWER

Miss Kathy Smith of Squamish, whose marriage to Mr. T. Thissen of Vancouver will take place on March 6th, was the guest of honor at a bridal shower in the church basement at Britannia Beach on Tuesday, Feb. 25th.

Miss Smith, who spent most of her life at Mt. Sheer, and is a 1962 graduate of Howe Sound Secondary School, was accompanied by her mother, Mrs. W. Smith and her sister, Miss Donna Smith.

The gifts were presented in a large box decorated as an electric stove. Miss Mary Louise Smith assisted the bride-elect in opening her gifts.

Hostesses were Mrs. Marie Horsting, Mrs. Helen Dzuris, Mrs. Ann Busko, Mrs. Kay Pickard, Mrs. Dorothy Trace and Mrs. Astrid Karwtski.

Most of the guests were old time residents of Mt. Sheer. Guests from Squamish included Mrs. Eric Anderson, Mrs. W. J. Elliott, Mrs. L. St. Laurent, Mrs. Elof Manson and Mrs. Dick Johnson.

DOWN IN THE ALLEY

In the **Squamish Mixed League** this week Tina Weiss took the Ladies' scores with 225 single and 547 triple, Derek Jenkins bowled the Men's single with 248 and Ray G. the high-three with 622. There were many other good scores.

In the **Royal Purple League** Terry Lepitre bowled the single 246 and Vi Antosh the triple 541. Other good scores ranged from 207 to 269.

In the **Early Birds League** Flora Blasko took the single with 234 and Grace MacDonald the triple with 587. Lou Skerratt, Edie Bishop, Elinor Carson and Hattie Olson bowled games over 200.

In the **Howe Sound Timber League** June Campbell and Gary Hendrickson were the high bowlers. For the Ladies' June bowled a 276 single and 674 triple while Gary rolled a 273 single and 640 triple for the men. Other good scores were made by Al Hendrickson 268 and Bonnie Breckenridge 246.

The Walnuts and Dogwoods rolled off to break to tie position of the first half. The Walnuts won.

It seemed like there was a contest for low scorers this week; Les 81, Keith 90, George 91, Rick 91, Ken 92. Makers of the other nineteen games between 100 and 120 are laughing with you — not at you.

E. Beckman rolled a 216 single and 597 triple for the ladies in the **Squamish Valley Riding Club and Lions League,** while J. Willson bowled a 284 single and B. Wood a 611 triple for the men.

In the **Elks Mixed League** Joan Knight rolled the top scores for the ladies with 264 and 580. Bob Stammers bowled a 303 single for the men and Jack Highland a triple of 636. Congratulations to Bob Stammers on receiving his "300" pin this week.

Jets, Lofters, and Hot Shots all have 3 points for a first place tie in this first game of the fourth quarter.

In the **Britannia Teachers League,** Mary Hoodikoff took the Ladies' high single with 204 and Bea Barritt the triple with 497. For the men, Peter Marconato took the single with 237 and A. White the high-three with 675, who took this with scores of 229, 223 and 223.

To the girl who had six blows in a row, your husband did the same thing last year.

The Road Runners won the third quarter with 28 points. The ladies have been bowling poorly lately. Come on girls, let's get with it.

In the **PGE League** Gail Summerskill and Elizabeth Antille tied for the high single with 219 while Eve Beckman took the high three with 627. Ralph Parker made a clean sweep of the men's single and triple with 231 and 613. Points for the night were Hits 'n Misses 4, Squamish Dairy, 0; Mix-ups 3; Hi-Ballers 1; Corners 4; One Big Fluke 0; Chieftains 3; and Chums 1.

On Saturday, March 14, there will be a Ladies Fun Day at Squamish Lanes. It will be sponsored by the Jean Neil Circle, UCW. There will be bowling for hidden scores and bake sale.

Restrictions

(Continued from Page 1)

lowing opinion, which should be of interest:

"In my opinion there are many aspects to this question and it is one that should be dealt with carefully.

"In the alpine areas, which are doubtless the most desirable from a recreational point of view, no timber of merchantable value exists, so this does not enter into the picture. The lower or fringe areas of most parks do have timber, but these parts are suitable more for camp and picnic sites than for hiking, photography and just simply enjoying scenery, due to the fact that in most cases heavy growth of all kinds is found.

"I believe that in these areas strictly supervised selective logging could actually be beneficial, but it is very doubtful that this type of logging would be economical. Obviously, the high lead method is out, and in many places the terrain does not permit any other method.

"It would appear to me that each individual area concerned should be dealt with on its merits, and no blanket rule could be devised that would be in the best overall interest in good park administration.

"In any case, logging under these conditions would probably have to be subsidized in one way or another, either by very low stumpage rates or roads built by the department, because no logger could handle a show such as this would have to be and survive.

"As for mining, this is a different proposition. A mine could create an eyesore, but also in some locations a mine may be situated where it would do no harm in a park.

"However, as anyone that has ever been involved in any mine development knows, there are in B.C. probably hundreds, and perhaps thousands of good known prospects that could be turned into producing mines, without rooting around in any park areas for a good long time to come.

"I would say that as far as mines are concerned, develop these before anyone goes into the parks looking for new ones."

HOWE SOUND HIGHLIGHTS

by Karen Kristiansen

More about school uniforms! The results of last week's vote was a majority of the girls in favor of school uniforms. This week a general votee was held.

The idea of uniforms came from the students. Apparently the girls' PHE class got the idea and spread it around the school. The uniforms would not be compulsory. They would be made available as the school jackets, sweaters, pins and rings are.

These uniforms may be worn at any time, every day or just as an occasional change from regular school clothing. Parents should like the idea because the uniform will be quite inexpensive. Girls will find a much easier choice when they face the daily "What to wear?" question. In fact boys could quite possibly have the same reason for liking the idea of uniforms. (Of course, they wouldn't admit it.)

One of the H.S.S. staff is missing with the mumps. Mrs. Goud has been away since Monday so all the girls who have been in Home Ec recently had better keep a close check in the mirror. We all hope Mrs. Goud recovers quickly.

P.S.—Only 15 school days till Easter exams; 19 school days till Easter holidays—and summer vacation in 16 weeks.

Shopping is more successful and satisfying when you start in The Times before you visit the stores.

Britannia Beach News

by Betty McNair

We are happy to welcome Mrs. B. Greenlee and Mrs. J. Moore to our community. The newcomers were welcomed at a "Get Acquainted" tea party at the home of Mrs. L. R. Norton last Wednesday afternoon. Mrs. J. Pate was co-hostess. Mr. Greenlee is the new general manager and with his wife and family has moved into the former McCutcheon home while Mr. Moore, who is the new mine superintendent, with his wife and family has moved into the former Gunn home.

Sorry to hear that Ronnie Knudson is a patient in the Squamish hospital.

Noreen Busko entertained for seven of her little friends at a birthday party on Tuesday of last week to celebrate her sixth birthday. Guests included Bonnie Arkinstall, Debbie Adams, Sherry Anderson, Wendy Cartwright, Jeanette Dyke, Judy Van Unen and Sylvia Vukoslavich.

Seven Britannia couples attended the annual District Guide Meeting and smorgasbord dinner at the West Vancouver Community Hall last week. They were Mr. and Mrs. L. Cartwright, Mr. and Mrs. D. Cripps, Mr. and Mrs. L. Holoien, Mr. and Mrs. D. Lindley, Mr. and Mrs. G. Manson, Mr. and Mrs. P. West and Mr. and Mrs. J. Yaky.

Old time residents, Mr. and Mrs. J. Proudfoot and Mrs. Gally were visitors at the Beach last Wednesday. They were guests of Mrs. E. Akers and Mrs. Jim McDonald. Mrs. Mary Siggers was also a visitor last Wednesday. She came down from Powell River to see her old friends.

Figures released

School value over $2 million

School buildings and their contents would cost well over two million dollars to replace, according to figures released by the school board of School District No. 48 (Howe Sound).

If the cost of the land were included it would run closer to two and a half million dollars, but the land costs have been based on the estimated purchase price not the market value at present, which would be a great deal more.

The following figures show the replacement value of the buildings and their contents:

Howe Sound Secondary High School	$ 715,781.28
Squamish Elementary	208,217.71
Multi - teacherage	99,250.32
School Board building	71,936.35
School Bus garage	15,420.79
Britannia Beach school	115,029.35
Woodfibre Elementary and teacherages	195,947.53
Alta Lake	29,370.85
Pemberton Elementary Secondary	234,190.25
Pemberton Meadows	71,696.29
Garibaldi School	25,249.55
Creekside School	19,390.74
Birken School	17,263.09
Brackendale School	100,231.61
Mamquam School	194,995.59
Stawamus School	87,174.74
Signal Hill School	63,309.97
Underway:	
Brackendale addition	70,991.29
Squamish Elementary addition	28,729.50
TOTAL	$ 2,386,864.68

In addition the original cost of the school sites is an estimated $75,000 but this figure would be unrealistic today as land prices in Squamish particularly are much higher than they were at the time some of the land was acquired.

Whither secondary education?

by R. Swanton

During the last two years, since the release of the Chant report, several changes have taken place in the curriculum content and offerings in B.C. Secondary schools.

These changes have been due in part, to the recommendations from the Chant report, and in part, to other pressures from society. The rapid increase in automation, with a corresponding decrease of unskilled and semi-skilled jobs is resulting in a situation where by a percentage of our population is virtually unemployed. This percentage is small now but unless something were done immediately, the percentage could go as high as 30% by 1975. This would mean that at least one quarter of our population could not be employed since they would not have the necessary skills.

This information is not new to most thinking people and it is not necessary to belabor the point. As a matter of fact, a number of far sighted people have been working for some time on the problem. Committees made up from all parts of society have been working very hard on the problem in Victoria and elsewher throughout the province.

The first changes in curriculum were introduced at the Grade VIII levels two years ago. The most noteworthy was the change in mathmatics — a change which was long overdue since there had been very little new introductions into mathematics since the year 1630.

Last year the new program in mathematics was introduced at the Grade IV and IX levels and in September, 1964, will be introduced at the Grade V and X levels. There have been changes in curricular content in other areas such as English and Industrial Arts. Special classes have been introduced for the benefit of those who cannot cope with purely academic subjects.

Eleswhere in this paper is a chart* which shows the proposed changes to be introduced in September 1965, for the Grade XI students and for Grade XII the following year. These changes wil be the most widespread and also the most difficult to institute.

A word of explanation should be given first, perhaps, before the implications of these proposals for our area can be discussed. The Junior Secondary grade levels have been designated as follows: Grade VIII — exploratory; Grade IX — preparatory; Grade X — qualifying. This means that the pupil must qualify by the end of Grade X for the program he or she wishes to follow in Grades XI and XII. He will have taken enough courses designated as "electives" that the area in which he shows the greatest aptitude should have been indicated.

It is expected that between 30 and 40 per cent will have shown an aptitude for the purely academic or technical field. The course offerings for both these fields are very nearly the same. The balance of the students will take one of the other programs. (It should be noted that two others, Vocational Agriculture and Vocational Fine Arts, may also be offered where there is a need.)

All students will take courses designated as General Educational Constants, on which they will spend 30 per cent of their class time. The remainder of their time will be spent on courses required for the program they elect.

In the case of Vocational Commerce, for example, all commerce students will take General Business in Grades eleven and twelve. The balance of their courses will be determined by the special area of commerce they select, designated "Specialties" on the chart.

At Howe Sound Secondary school an attempt is being made to provide electives at the Junior Secondary level in order that students may qualify for one of the programs at the secondary level. This means that the school must select in advance which of these programs it will be able to offer in two years time.

All vocational courses are expensive. Machines, tools and supplies have to be provided. Classes must be smaller than ordinary academic classes because of the amounts of equipment needed and the need for more individual instruction. Extend facilities as required in order that Junior classes may continue with their regular program.

These factors will govern which programs will be offered at our school. Another factor which is quite a stumbling block is the matter of teacher entitlement. No change has been made in the formula which governs the ratio of teachers to pupils in the secondary school. This formula simply takes the total number of pupils and divides this number by a set figure to determine the number of teachers for which a grant will be paid by the Department of Education to the School Board. Included in the total number of teachers allowed are all the specialists in each subject area, the counsellors and administrators.

This factor will be one which will have a great effect on which programs will be selected.

In our school we will be offering two of the Vocational Commerce specialties, probably, and also, it is hoped, vocational mechanics and vocational carpentry (construction). Any others will be governed by the desires and needs of the students and their parents, and by the facilities and instructional staff available. Additional facilities will be required in any event, in order to offer the courses suggested above.

* Ed. Note: The accompanying chart mentioned by Mr. Swanton unfortunately could not be used as it would have taken up too much space and been difficult to reproduce.

Social Notes

Mr. and Mrs. Marvin Kempston have moved to Rossland.

R. Silcock is working at the hospital while Mr. Beckman is in hospital in Vancouver.

Miss Elaine Dodds of Edmonton spent a weekend in Squamish visiting Mr. and Mrs. E. F. Casey.

Jim Barnfield leads class

Jim Barnfield led the class in the operation of heavy machinery at the B.C. Vocational Institute at Prince George.

An employee of the PGE, Jim is the elder son of Mr. and Mrs. Fred Barnfield of Squamish. Jim and his wife Rita moved to the Interior city last August after living in Squamish since their marriage.

Social Notes

Our sympathy is extended to Clayton Wessels on the death of his father in Vancouver on February 22.

About 6000 everyday products -and 2 million acres of prime trees!

Cellulose is one of man's most useful raw materials, and you consume enormous quantities of it. Cellulose is Rayonier's business. Here in British Columbia, for example, we account for about 21% of total Canadian output of this versatile product.

Who uses cellulose?

Everybody? Yes indeed! For example: it's used to make thousands of miles of fabrics and millions of tons of tire cord, photo film, plastics, sausage casing, cellophane, cigaret filters . . . and nearly 6,000 other products.

What's new in British Columbia?

Merely to keep pace with world demand for cellulose, Rayonier is embarked on another big expansion program. A good deal of money is earmarked for work at Port Alice and Vancouver plus a 100,000 ton expansion at Woodfibre — just to keep the company in strong competitive positions.

Take away the Rayonier cellulose?

You could almost as easily take away those 2-million acres of tree farms in the U. S. A. and Canada — where it all starts!

PRICELESS!

It's impossible to hang a price tag on this bottle of blood. Fortunately, in this country, no one ever does. Your Canadian Red Cross provides whole blood and blood products absolutely free to almost 300,000 victims of illness, accident and disaster every year. All that's ever asked is your support. The Blood Transfusion Service is one of the many ways the Red Cross serves this community, this nation and the world. Through the Red Cross your help does so much for so many.

YOUR RED CROSS SERVES YOU
EVERY STEP OF THE WAY

Library services are important

by Elvin Gordon

In these days when accumulated knowledge is doubling approximately every ten years, the need for organized libraries is apparent to all.

All communities are not so fortunate as this one in having responsible government bodies actively supporting the establishment of library services. Even with this help, however, most of our libraries in the Howe Sound Communities could not function without the generous support of volunteer labour.

The Squamish Public Library, directed by Mrs. F. Clarke, serves the Howe Sound communities with books, and a film library, the latter in conjunction with the National Film Board. Membership is free to students, and is one dollar per annum to adults. This library is housed adjacent to the Village Office on Second Street, and is the result of a 1958 Centennial project.

The Woodfibre Library was nearly lost recently in flood waters, but under the direction of Mr. Vic Biden and Mrs. Frizell is still serving the needs of the pulp town.

Britannia volunteer groups maintain a children's library in the school, and another in the Community Centre for adults.

Pemberton Meadows has a set of books on loan from the Public Library Commission in Victoria which is kept in a private home.

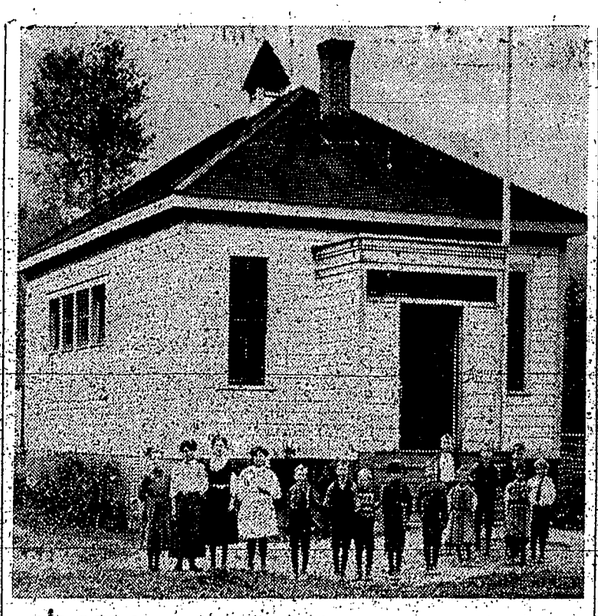
People living in more remote areas, or those wishing books on special subjects can write to the Open Shelf Branch, Public Library Commission, Victoria, for assistance in meeting their needs.

School libraries include the Howe Sound Secondary Library under the supervision of Mr. H. Johns, the Pemberton Secondary Library under Mrs J. Buss, and a supplementary reading program under the direction of the Elementary Supervisor, Mrs. H. Fraibanks.

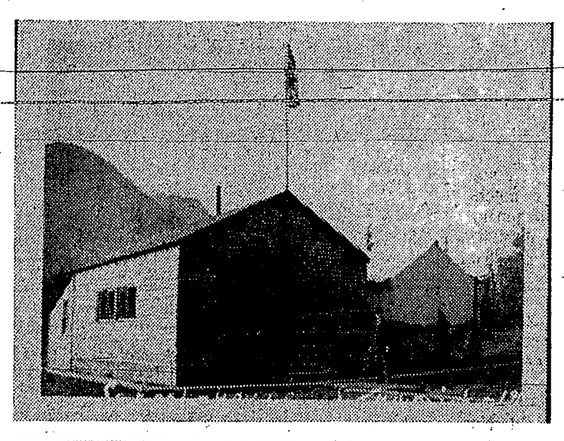
In addition, the District Library maintains a free reading program for the elementary classrooms on a rotation basis so that each classroom receives 800 to 1000 books during the school year. This same office maintains a filmstrip library and a film loan service for the use of all public schools in the district.

* * *

ED NOTE: The editor wishes to bring to your attention that the writer, who himself runs the District Library, has failed to mention that placing 800-1000 books in a classroom in a year, because of the rotation of the District Library, gives pupils about ten times the choice of books which he had before the District Library was operating. The results are evident. Mrs. F. Clarke, in her report to the library association, noted that juvenile circulation in the public library was down 5 per cent as a result of the excellent libraries in the schools. Mr. Gosling, principal of Stawamus Elementary, comments "They sure use it," (the classroom library in his school).



THE BRACKENDALE SCHOOL in 1908. Among the pupils who may be known to people still living in Squamish are Mary Harris, Belle Harris, Olive Judd, Earl Judd, Willie Judd, Edith Judd, Ruth Judd, Maurice Rae, Lawrence Rae and James Rae.



FIRST SCHOOL in Squamish. Photo taken in 1914.

Occupational program

by Peter Zebroff

Preparing students for future employment and way of life is the primary objective of any educational programme. It is also the objective of the occupations stream now in its second year at H.S.S.S.

Designed primarily for students who are older and most likely who will be leaving school within three or four years because of age, the courses are geared to teach basic fundamentals. At the conclusion of a three year period it is intended that the student be ready for employment or vocational training for an apprenticeship.

In addition to this basic course there is a planned program to acquaint the student with various industries and businesses in which they could possibly find employment. This portion, called the World Training Program, has been in operation for some time. Last year several students actually spent school hours working and learning at a variety of occupations represented in our own community.

This year the program is being formalized into three major stages. In the first stage, students will make excursions in groups to observe from ten to fifteen local businesses and industries. This stage will generally take place during the first year of the program. In the second stage, students will spend two or three half-days per week in pairs of serving any job they find particularly interesting. Finally, in the third stage, the student will actually spend a sizable portion of his school time working at the job for which it has been determined he has some special aptitude. The third stage will generally be carried out during the third year of the program.

This far, in the school year 1963-64, the class has made four excursions and another six are planned. The group has visited the offices and workshops of PGE, Colleen's Hairdresser, Visona's Chevron Garage, the office, kitchen and the general industry of the Chieftain Hotel. Further plans include visits to Empire Mills, Britannia Mines, and local service industries such as grocery stores, and the Squamish Hospital.

The ultimate aim of this program is to provide students with skills which will enable them to support themselves, and to provide useful members of the community.

One man's opinion

by Henry Johns

Today we must teach children and teenagers who live in a changing society. The question which we must face is what can we teach them which will be useful to them later. Since our society is changing so rapidly, facts we teach them today may be outdated by the time they graduate.

I believe that we must teach them four skills. First, we must teach them how to acquire information quickly and correctly. Not only must we teach them how to read skilfully and quickly, but we must also teach them how to gain information from mass media, e.g. radio and T.V., how to listen carefully to others, and how to question people skilfully.

Next, we must teach them how to think. They need to know how to use information which they acquire. Consequently, they should be taught to reason skilfuly, using not only deductive logic (mathematical thinking) and inductive logic (scientific thinking), but also using careful and skillful comparisons.

Third, we must teach them how to express themselves clearly and concisely. They must learn how to communicate their ideas to others effectively. To do so, students need to study not only the rules of grammar and usage, but also how to put their thoughts together in an orderly fashion and how to choose the correct words and expressions to express these thoughts.

Finally, we must teach them to respect others. This respect for others is the basis of our democratic society and the value for which our forefathers fought so hard and long. If we wish to preserve our freedom, it seems to me that this skill is possibly the most important one which we have to teach.

However, I do not suggest that these skills are a new emphasis. The emphasis on "reading, writing and arithmetic" in the early part of this century emphasized these skills. All that is needed today is to place these skills at the core of the program and to emphasize that they are more important than any accumulation of facts taught.

STATISTICS TELL STORY OF GROWTH

Our school district has grown since 1946 when the district was formed, as statistics show.

Year	No. of Teachers	No. other employees	Monthly payroll
1946	17	8	$ 2,834.80
1951	32	15	10,215.00
1956	44	*	16,980.50
1961	55	30	38,848.57
1963	67	34	47,596.86

Total school expenditure for 1963 $852,299
Cost of running schools in the district for one day $ 4,261.49
Cost of schools for a pupil for a year $ 530
Cost of school for a pupil for a day $ 2.65

WHEN A PERSON BUYS A CAMERA HE NEEDS SOMEBODY TO TALK TO

There is a lot that automation can do, but it's a fact that some things still can be done only by people.

You take when you buy a camera. Automation is no substitute for the experienced man behind the counter.

Automation can't give you sound advice on the type of camera to select for your purpose and your price.

Automation can't answer the hundred-and-one different questions that may come to your mind when buying.

Automation can't give you counsel on taking pictures . . . it can't guide you against making costly errors.

Automation can't offer you a sympathetic ear, an adjustment, an instant "make good" if something goes wrong.

And, come to think of it, you can't get a single one of these at a discount either.

WHEN A PERSON BUYS A CAMERA HE NEEDS SOMEBODY TO TALK TO. He needs the personal touch of the specialist. He needs neither mechanical man nor a quick brush-off. If you've had enough searching for the ideal combination of savings and service, learn what the "PERSONAL TOUCH OF THE SPECIALIST" can do for you at our store.

Teachers meet in North Van

On Friday and Saturday, February 28 and 29, the teachers from the Howe Sound School District accepted the North Van Teachers' Federation's invitation to a conference in Delbrook Senior Secondary School.

On Friday, our teachers attended two addresses by Dr. Maurice Freehill of the University of Washington, listened to a panel discussion, and held a teachers' meeting. On Saturday they returned to listen to an address by Mr. Gerald Nason, Secretary-Treasurer of the Canadian Teachers' Federation.

The theme of the conference was Education in the Near Future. On Friday, Dr. Freehill spoke on "Education for Modern Man" and "Education Assignment for 1970". In his first talk, Dr. Freehill stated that our program of education is changing towards specialization and an emphasis on abstract intelligence and that our philosophical ideas are changing from optimism to pessimism.

He said that teachers and educators must discard the assumption that they are teaching minds to be filled with pieces of information and must assume that all learning involves pupils' emotions and that the advantage of the human mind over computers and rats is the ability to reorganize information.

Dr. Freehill concluded that parents and teachers can best help children by providing models of behaviour with which they can identify or models by which they can see their relations with others. In this way, rather than learning to be needy people because of the influence of T.V. and other mass media, the children would learn to become independent by loyalty to a group and identification with models of behaviour.

In his second address, Dr. Freehill discussed the responsibilities of the teacher in education. He said that the teacher needed, first of all, to be aware of the background of the people whom he is teaching, because ideas which completely contradict that background will not be accepted. The teacher should respond to the student as an artist, but shold then evaluate as a scientist.

The learning produced should be productive of new ideas rather than the repeating of predigested ideas. To enable students to become productive, teachers should teach fewer facts until the structure and relations behind the subject are grasped. Once the structure has been grasped details can be added quickly.

To motivate students, teachers should try to use the rewards which society naturally provides. They should promote a condition of mild alertness to promote the educational outcomes of reflection, conviction, and imagination.

Mr. Gerald Nason spoke on teaching in the 1970's. After a summary of the changes and pressures which would come on teachers, he said that the implications of these changes were that teachers should equip pupils to live with themselves and a scientific world, they should use teaching machines, they should increase their competence, they should increase the use of audio-visual aids, and they should study the role of the Department of Education and the School Board.

To meet the challenges of teaching in the 1970's they should improve their qualifications, take the lead in improving teaching methods, improve the curriculum, improve teacher training, and see that the roles of the primary agencies of education in our society are defined.

POLICE COURT

The following cases appeared before Magistrate W. J. Elliott in police court recently.

W. Stonehouse, charged with creating a disturbance in front of the Chieftain Hotel last November, by fighting, was fined ten dollars and costs.

Wayne Drenka, charged under the government liquor act for being in possession of liquor while under 21, was fined forty dollars and costs. As he was on a suspended sentence, he was fined ten dollars and costs on a previous conviction of causing a disturbance.

W. Nielsen, charged with issuing a cheque without sufficient funds to cover it, was sentenced to fifteen days in Oakalla.

FUN FAIR

by Sandra King

It seems as if everyone enjoyed himself at the Fun Fair. Teachers and students alike pitched in; the spirit of co-operation prevailed throughout all preparations.

The chuckwagon with its tantalizing aromas filled the corners of Front Street beckoning to all who passed by. Of course, the saloon had its shapely points too. Besides those refreshing pick-ups to wet dusty throats. Cowboys and ranch hands roamed the street, now and then stopping in at the general store, the library, or the home baking section of town. They could test their nerves and their shooting skill. For those who wanted to do something requiring absolutely no skill, only money, there was the bingo stall.

The prison was stocked full of desperate characters to be bailed out into slavery. Bankers were forever attending anxious people wanting to exchange their real dollars for phoney "bucks."

Almost $800 was collected this year. Mr. Swanton expects that the clear profit will be approximately $500 which will be disposed of by the PTA for scholarships, awards and donations to the Students' Council.

Everyone contributed to make the Fun Fair the big success that it was.

Britannia Beach News

by Betty McNair

Mrs. Ray Knudson is spending a few days at Gibsons.

Mr. and Mrs. Jack Graney, former Mt. Sheer residents, and now of Hope, were week-end guests of Mr. and Mrs. Earl Trace.

Mr. and Mrs. Norman Scott have moved from Minaty Bay to Abbotsford. Mr. and Mrs. Paul Saviety will be moving from the Beach to the Scott house this week.

Guides, mothers at banquet

1st Squamish Girl Guides invited their mothers to attend a mother and daughter banquet in the Christian Education Center on Tuesday evening of last week.

District Commissioner Clubb with Guide Captain Applin-Flouch, presented Sharon Kindree, with her first aid and home nursing badge. She was also made company leader.

Cheryl Hill and Maureen Swanton received their second class pins and patrol leader's lanyards from their captain.

A cake, baked in the shape of the Guide trefoil, centred a small table and District Commissioner Clubb lit a candle representing Guides throughout the world, followed by Captain Applin-Flouch, for Canadian Guides and Lieut. Carradice, whose candle was for the Guides in B.C.

Each girl in the company came up to the table, lit a candle, and mentioned the country she represented: one of those in the Guiding movement.

Following the banquet Rev. Penrose showed the group a film entitled "Esther of Indore High", the story of a girl in India who was also a Girl Guide.

The Corporation of the Village of Squamish

NOTICE OF PUBLIC HEARING

A public meeting will be held in the Council Chambers of the Municipal Hall at **8:00 p.m. Tuesday, March 17, 1964** to discuss amendments to "The Village of Squamish Zoning By-law No. 105, 1960" as follows:
It is proposed to amend:

(1) Section 6, Clause 7 of By-law No. 105 to read as follows:
"Garages or accessory buildings shall be set back eight (8) feet from the rear lot line allowing an unrestricted view to the lane and dwellings shall be set back twenty-five (25) feet from the lot line abuting a lane or from the rear of the property".

(2) Plan 3960, District Lot 486, Block 17 Lots 14, 15, 16, 17 be re-classified from residential to commercial classification.

(3) In the area bounded by Cleveland and 2nd Street and Pemberton and Victoria Street that
(a) Lots twenty-five feet in width be required to allow for 500 sq. feet of parking area.
(b) Lots fifty feet in width be required to allow for 1000 sq. ft. of parking area.

(4) That part of District Lot 4266 be reclassified from "Trailer Park Zone" to "Industrial Zone".

(5) That part of District Lot 4261 be reclassified from "Commercial Zone" to a "Residential Zone".

A copy of By-law No. 105 and the proposed amendment may be viewed by the public during office hours at the Village Office.

All interested Squamish residents are welcome to attend.

GLENN M. FELL
Village Clerk

NOTICE

To the residents and employees of the Squamish Valley

The Association of Howe Sound Industries, (being an association of the major industries in the Howe Sound and Squamish Valley formed to take action on matters affecting the orderly development of the area including access and housing) wishes to advise all resident people working in the Howe Sound and Squamish Valley, and tourists to the area that the committee has requested the Honorable Minister of Highways, Mr. P. A. Gaglardi, to bring the Squamish to Britannia Road up to minimum highway standards.

The Committee points out that in August 1958:

There were no industries operating in a major way. Since 1958 the Woodfibre mill has been completely modernized and now a further $21,000,000.00 expansion is underway. The Britannia mine has reopened and a major exploration program is being undertaken. The sawmill, under the Forest Management Program, opened in January 1963, the MacMillan Bloedel logging operation is now commencing in the Mamquam Valley.

All these changes in the industrial pattern have resulted in a major alteration in employment in the area and the use by the employees of the new highway. The Provincial Highway Department has done an outstanding job of maintaining and improving the present road, which was originally built about 1933 as a relief project. The capacity of the present road has been reached as regards to the commuting of employees to and from the Squamish area and the movement of industrial supplies and products. The road is dangerous and the possibility of casualties is ever present and increasing.

The extension of the highway from Alice Lake to Alta Lake is nearing completion and will be in use this summer. The Garibaldi Olympic Development Association is drawing attention to the Garibaldi Park as a ski and general tourist area and propose the development of the Whistler Mountain ski slopes. The further extension of the highway on to the Pemberton Valley has now started.

The present capacity of the Britannia to Squamish Highway is now fully taxed over part of the year due to the tourist flow. It is felt that with the opening of the Alta Lake section shortly, the capacity of the road will be completely overtaxed.

The group of industries mentioned previously has invested very large sums in the area to provide employment and development of the area. It is essential for their efficient operation to have the uninterrupted flow and movement of products, materials and supplies and quick access for employees commuting to their homes.

The Committee has been informed by Hon. P. A. Gaglardi that no definite action on the road is contemplated.

The Committee would request all workers, residents and all interested visitors to write or telephone collect Mr. Gaglardi or their M.L.A. supporting their request.

WRITE:
Hon. P. A. Gaglardi

Cloverdale, B.C.

Only those who submit **COMPLETED** applications and relative material to the above office by

MARCH 15, 1964

may expect to have their applications given priority in consideration of work to be carried out in the province during 1964.

Mr. A. H. Turner, Deputy Minister — Hon. F. Richter, Minister of Agriculture

January, 1964

Outdoor News

By John Wright

Mr. Kiernan:

I hope your remarks, of the previous weeks, on the possibility of opening up the provincial parks to commercial enterprises, mainly mining and logging, are, as you announced last Friday, nothing more than testing public reaction.

If this is so, I trust it will be forgotten. This, I regret to say, is most improbable, seeing that idol of power, the almighty dollar, must be served.

It has been said that the logging and mining would take place only in the remotest areas of the parks, and that this in itself would be a boon to the public by giving more access to wilderness areas. Access be damned!

The parks were set aside by our forefathers, who had the foresight to realize that the unadulterated land mass murder, which was already in the making, would ravish our forests.

We, the people of this province (our so-called evergreen playground) realize the value of the logging and mining industries, but they must be kept within the bounds of reality.

It has been noticed from prior experience that to give an inch would be to take a mile, also if the okay is given I doubt that future generations will ever know what a mighty Douglas fir looked like.

In closing I make a suggestion. If the parks must be opened, they should be sold, tree, rock and stream, to the highest bidders, and the many millions of dollars received distributed to the general public (which might make our fortunes.) Then if anyone did not like it, the government could say "You can leave."

Epitaph, 2100 A.D.: Encyclopedia explanation, British Columbia: once the home of mighty forests, now a land of desert.

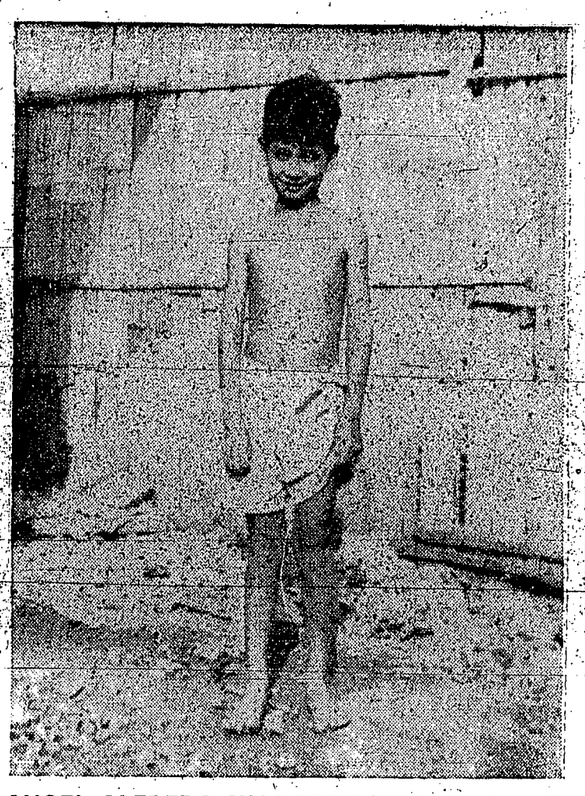
Alta Lake Ripples

by Kelly Fairhurst

Bernie and Mary Morris, Pete McIntyre and Stefan Ples came up to their cabins and visitors at the lake included Bill Russell, Emma Nering and Sandra Garr.

Glen Creelman went to Mt. Baker to ski on a Saturday, only to return to the lake for the next day's ski-ing.

Mrs. E. A. Fairhurst was in Squamish Hospital recently recovering from a severe attack of flu.



ANGEL ALFREDO SUARAEZ BORJA, destitute 7-year old Ecuadorian boy, financially "adopted" by Prime Minister and Mrs. Pearson through Foster Parents Plan, Montreal. (Readers interested in the Plan may get information by writing Box 65, Station "B", Montreal.)

Foster parents' plan

Pearsons 'adopt' Ecuadorian boy

Prime Minister Pearson and Mrs. Pearson have financially "adopted" Angel Alfredo Suaraez Borja, a destitute 7-year-old Ecuadorian boy, through the Parents' Plan, Montreal. Angel (a common boy's name in Spanish) is the first Ecuadorian to be enrolled by the plan, which has just opened an office in Guayaquil.

He lives with his mother and father and seven brothers and sisters in a shack of wood and cane. There is no running water, no sanitary facilities. Drinking water in Angel's poverty stricken community is rationed from a government tank truck which passes every eight days.

The father earns less than 80 cents a day as a night watchman, and an older sister brings in a few cents more as a servant.

Like other foster parents, the Pearsons pay $16 a month. They get a photo and case history, and can regularly exchange letters.

Angel gets a cash grant of $8, which the family can spend for their most urgent needs. In addition the youngster will get regular food parcels and issues of new clothing, plus necessary medical care.

Commented the Prime Minister: "This is purely a personal gesture on the part of Mrs. Pearson and myself. We agreed to the Plan's request that they be allowed to publicize the adoption, as other public figures have before us, only because of the hope that it might encourage other Canadians to participate in this way in the fine and unselfish work of Foster Parents' Plan.

"Mrs. Pearson and I hope that with this small gesture we will help forge a further link in the chain of friendship between our country and those less fortunate peoples with whom we must share this rapidly shrinking world in peace and understanding."

Individuals or members of a group can financially "adopt" a destitute child of the age and sex of their choice, from any one of eight countries. For details write Foster Parents' Plan, P.O. Box 65, Station "B", Montreal.
