## Reforestation program saw extensive tree planting in local district in 1966

### NO ODOR FROM CHEMICAL PLANT

A letter from Dr. P. J. Reynolds of the Coast-Garibaldi Health Unit, read at council last week, said that no traces of chlorine had been found in the air since the incident in September of last year.

The Health Unit had been informed of the results of samples of the air which have been taken regularly since the September incident and were told there had not been a trace of chlorine noted in the down wind areas.

Dr. Reynolds said he was sure the company was doing everything in its power to keep the incidence of chlorine odor to a minimum and should be commended for their efforts.

### Board seeks new site for school

A delegation from the Board of School Trustees Howe Sound School District number 48, met with the municipal council last week to discuss the possible acquisition of a school site in Valleycliff and several other matters.

The board felt the population in Valleycliff had reached such numbers that a school site in the subdivision should be considered. The Stawamus School could not be enlarged much

more and with the site on top of the hill, no further playground space was available.

Council felt a school in Valleycliff could be an excellent idea and suggested a conference with the owners of the property to see if a site close to the apartment block could be obtained.

The board also discussed the acquisition of further ground at the rear of the elementary school at Squamish and south of the loggers sports ground for enlargement of the school playground area. This would take in all the property to the former logging road.

Council was agreeable for this use of the land in question and would back the school boards request to the railway company which owns the property.

Amalgamation of library services with the Public Library uniting with the high school library to serve the community was also discussed. Council was told this is becoming a common practice in the United States and there were some instances in Canada.

Economy and better service for the community were two of the reasons advanced for this. Council felt the matter would have to be thoroughly discussed with the library board before any decision was reached as there might be many arguments both for and against the idea.

The board also discussed the question of a street light at the school bus garage site and was told that this had already been approved.

### Shows film on Squamish

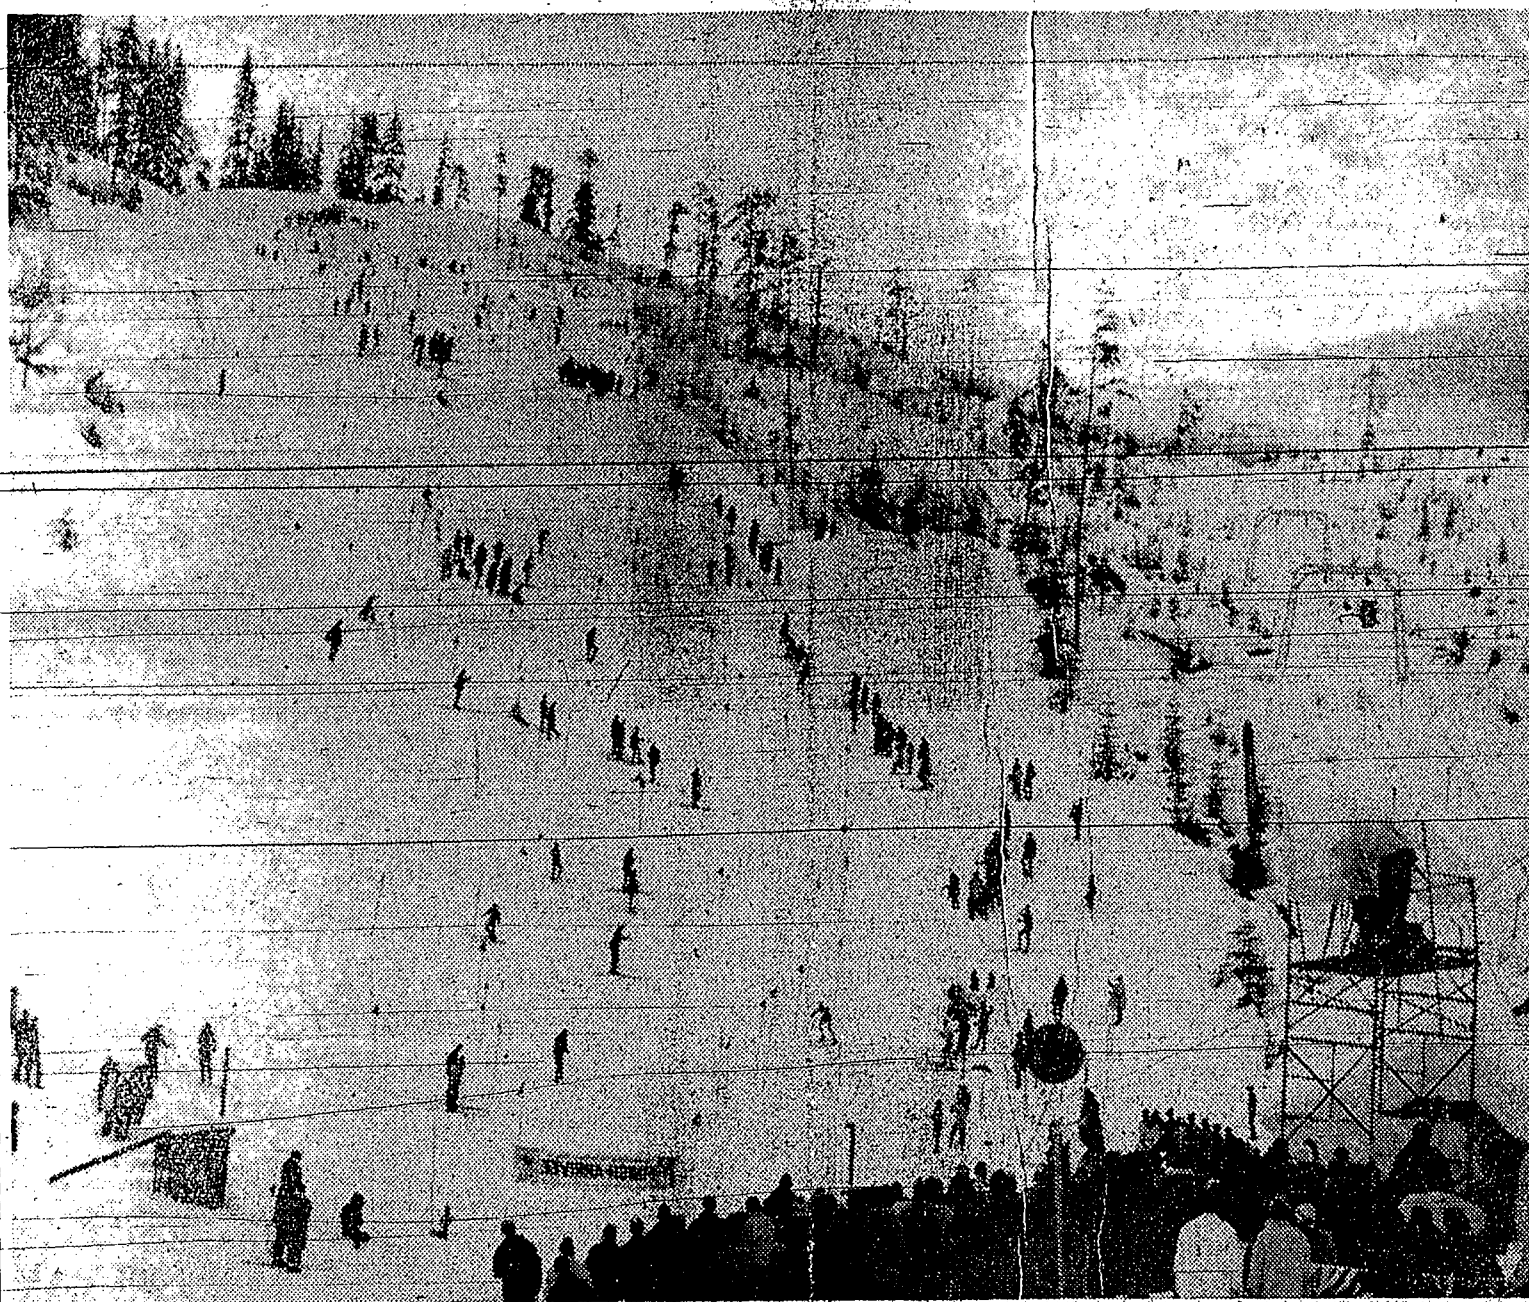

P. N. Goode visited the Burnaby Chamber of Commerce on Monday, January 16th and showed the film on Garibaldi Highlands "A Town is Born" to the meeting.

Following the film he gave a talk on Squamish and its potential as a harbor and future industrial area.

### Guides and Brownies meeting

On Thursday, February 2nd at 8 p.m. there will be a meeting of the Garibaldi District Association of Guides and Brownies. The meeting will be held in the United Church.

All guides and parents are very welcome.

RAIN was falling as people lined the slalom course at Whistler last weekend for the ladies slalom. Contestants came down the hill between the flags.

### New Expo '67 stamp

A Canada Post Office 5 cent commemorative stamp to salute Expo 67 features a view of the Canadian Government 11 1/4 acre \$21,000,000 Pavilion on the 1000-acre Montreal Exhibition site, Postmaster General Jean-Pierre Cote announced recently.

Release of the new issue has been planned to coincide with the opening date of the World Fair which is scheduled for a six-month period from 28th April to 27th October, 1967.

Produced in colours of red and blue on white, the stamp will be large in size and horizontal in format. It will be available at all Post Offices in Canada for ten days commencing 28th April, 1967, and in Montreal until mid-October.

Rain fell during the afternoon race where Nancy Greene won both sections of the slalom with runs of 49.76 seconds and 54.43

## DuMaurier International drew many European stars

Almost a foot of snow fell the night before Saturday's first race at Whistler where the western half of the DuMaurier International took place last week.

Skiers cleared briefly in the morning for the men's giant slalom won by Werner Bleiner of Austria in 2 minutes 37.27 seconds, Jacob Tischhauser of Switzerland placed second with 2:39.70 and France's Georges Manduit was in third place with 2:39.87.

Peter Duncan of Canada was in fifth place followed by Scott Henderson, also of Canada.

seconds for a combined total of 1:44.19. Christine Goitschel Beranger was in second place with a combined total of 1:48.07. Rosie Fortna of the United States who placed second in the first half with 51.87 seconds, fell behind to come in third behind the French star.

Edith Hillbrand of Switzerland placed fourth followed by Karen Korsanta of the United States and Inger Jochum of Austria.

Karen Dokka fell in the second half of the race after making a good run in the first half. In the ladies giant slalom on Sunday morning, it was Nancy Greene all the way. Snow was falling during the race but she came down the mile long course in 1:58.91, two seconds ahead of her closest competitor, Ruth

Adolf of Switzerland who was timed at 2:00.92. Inger Jochum placed third with 2:02.09, closely followed by Christine Beranger with 2:02.36.

Rain fell again during the afternoon when the men's slalom was held. Haakon Mjoen of Norway placed first with 1:24.32. In second place was Pierre Stamos of France close behind with 1:24.52, followed by Jacob Tischhauser of Switzerland with 1:26.48.

Despite the weather which was wet but not cold, a good crowd attended the meet with an estimated four to five thousand people present.

The remaining half of the meet will be held at Mount Orford in Quebec on Feb. 4 and 5.

## Replanted more than 1200 acres

More than twelve hundred acres were planted with a record number of more than six hundred thousand seedling trees last year and local Forest Ranger M. N. Neighbor said more would have been planted if the trees had been available.

"Tree stocks were down," Mr. Neighbor said, "and we could not obtain as many as we wished. Our ultimate aim is to replant all the acreage logged but this will not be possible till 1968 or later, when tree stocks are once more built up."

"Last year's record cone crop was also high in seed, and this will bring stocks up again so planting can commence. However it will take two years to bring the trees to the point where they can be used in the reforestation program."

Other highlights of the annual report were the annual cut, down slightly from last year, and the comparatively low cost of fire fighting.

Costs amounted to \$2,893 for the Forest Service and \$7,432 for the companies, much less than 1965's \$35,278. However it was a far cry from the low cost of \$115.96 in 1964.

### VARIED CAUSES FOR FIRES

There was a total of 15 fires in the district in 1966, exclusive of the small ones along the railway.

Of the fifteen, four were caused by campers and travellers, two by smokers, one by road and power line construction, six from industrial operations and two from miscellaneous causes. There were no fires caused by lightning or incendiarism.

Small spot fires along the railway amounted to 439, less than a quarter of those discovered in the preceding year. New ballasting which in many cases has heaped gravel around and over the ties is credited with cutting down on the tie fires. The railway also maintains a patrol system.

Mr. Neighbor said the damp summer which kept forests moist could be credited with the low fire incidence. "There was no real build up except in August," he said, "and it built to a high hazard condition just before it ended."

### SLIGHT DECREASE IN ANNUAL CUT

The annual cut decreased slightly from 33,818 mcf in 1965 to 33,608 mcf last year. Acreage logged last year was higher, 5947 acres compared to

3800 the preceding year but Mr. Neighbor explained a change in classification caused this difference. "This acreage includes everything," he said "Shakes, poles and some of which was secondary logging, of former logged over areas."

The total value of the timber cut was estimated at \$11,847,000, almost three million dollars below the value of the 1965 crop. The ranger said some timber had not been sold and was estimated at market prices which were the lowest they had been in years. This accounted for the lowered value of timber cut.

### SNAG FALLING PROGRAM

The snag falling program continued for the third straight year with a total of approximately 250 acres cleared of snags. The program at Base Camp near Diamond Head was cleaned up before Christmas when 140 acres were done and crews are presently working at Rubble Creek near Garibaldi where some 100 acres damaged in the 1957 fire are being cleaned up.

Most of the timber in the snag falling program is not salvageable but as much as possible will be utilized. Mr. Neighbor said weather and insects would have damaged the trees left standing at Rubble Creek but only after close examination once they were on the ground would he be able to determine if they could be used.

There was no money for a trail program in 1966 but the suppression crew cleared the brush on three miles of the trail to Rainbow Lake. A mile of the old railroad grade between Alice Lake and the Stawamus was cleared for use as a fire trail by the same crews who also cleared two miles of road just south and east of Alta Lake which leads to a portion of the planted area.

The suppression crew also built ladders along the trail to the lookout north of the Chief.

This crew was at the suppression camp on the Mamquam River from June 13th to Aug. 31st and the ten members of the group were involved in the fire fighting in the area.

### REFORESTATION PROGRAM

Planting was done in two sessions; with 420,000 trees planted in the spring on 840 acres and 200,000 trees planted on 370 acres in the fall.

(Continued on Page 3, see "REFORESTATION")

CANADA'S NANCY GREENE smiling at the camera while Christine Beranger listens intently as Peter Webster talks to Ted Reynolds at the du Maurier International.

## Nancy Greene shows championship style

Canada's Nancy Greene took the first race of the du Maurier International meet at Whistler Mountain last week. After the first race on Saturday, run in the rain after a foot of snow had fallen the preceding evening, she smiled and said she was delighted to have come back to Canada for the race.

It was an opportunity to help Canadian skiing and even though she missed some important races in Europe by coming back to Canada for this top national meet, she felt it would further the cause of Canadian skiing.

Christine Goitschel Belanger, who placed second in the race, was asked if she had ever skied in the rain before and with a grin, remarked that she had

never skied in Canada before. Nancy Greene, who has a busy schedule ahead of her, with races and meets booked until the middle of March, still stands an excellent chance of winning the World Cup as three important meets in the United States count towards it.

Her skating finish in the second half of the ladies slalom on Saturday drew delighted applause from the audience.

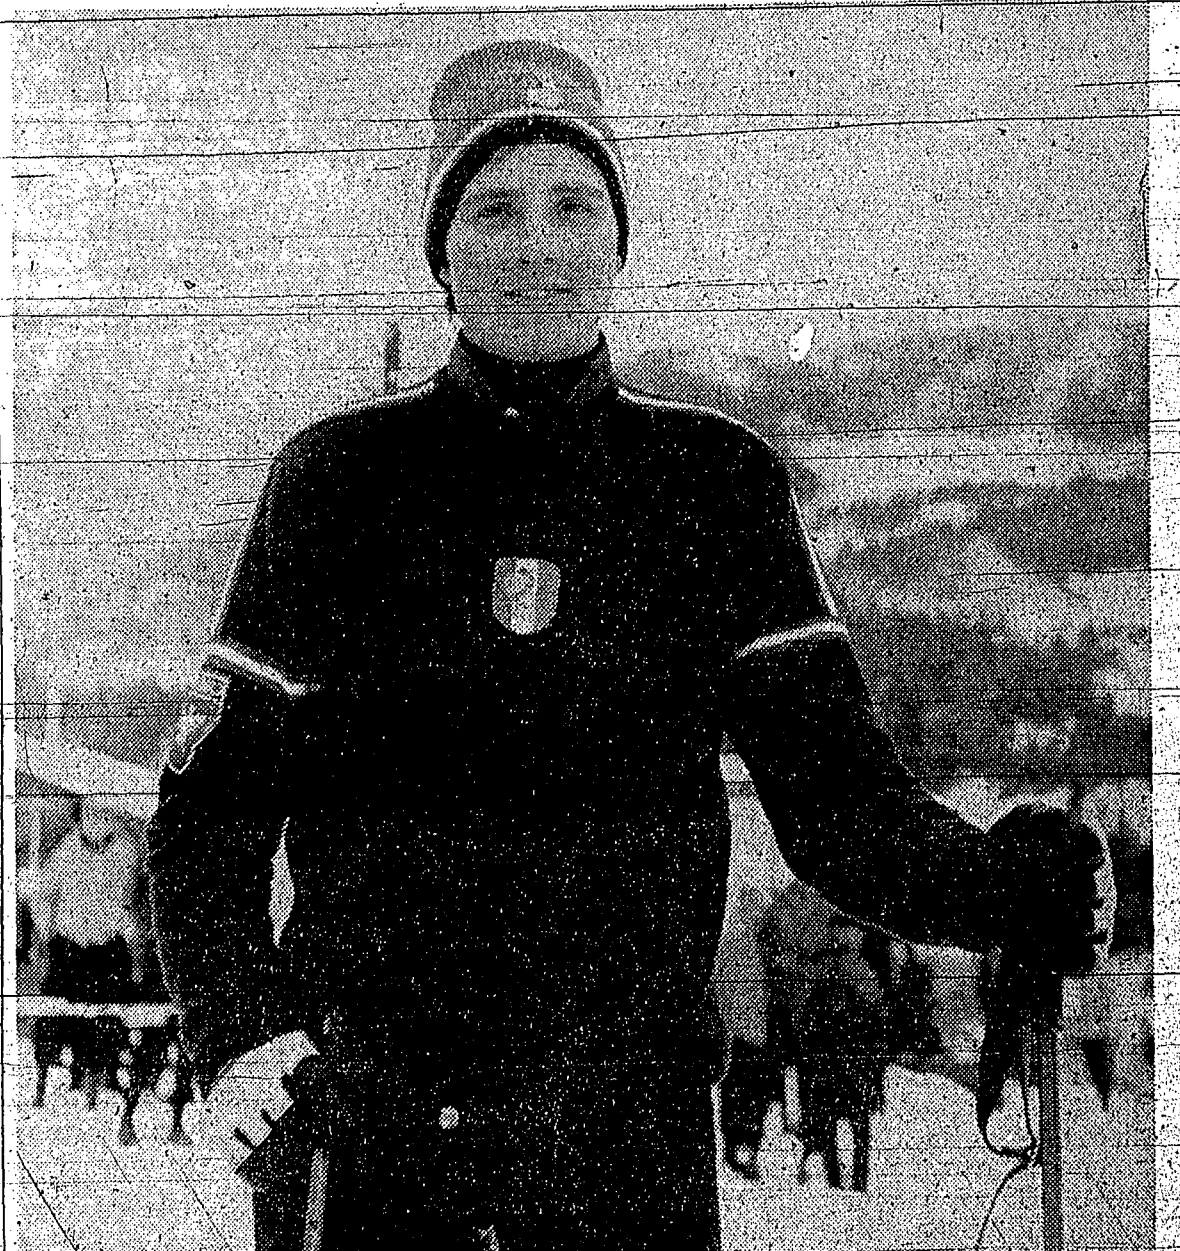

She won the race by a full four seconds, with a combined time of 1:44:19. In the Sunday event, the giant slalom, she finished two seconds ahead of her closest competitor, with a time of 1 minute, 58.91 seconds, followed by Ruth Adolf of Switzerland.

## CALL TENDERS FOR LIGHTING

Council was notified last week that tenders have been called for the installation of lighting at the access road and the main highway at Squamish.

Concern had been expressed over the conditions of the highway at this point where darkness on these winter nights presents an extreme hazard.

Council had offered to assist in the installation of these lights but the offer was turned down.

CHRISTINE BERANGER, top French skiing star, who placed third in the slalom at Whistler on the weekend and fourth in the giant slalom.

## Not asking for handouts

B.C.'s logging industry and particularly, her strongly individualistic small loggers, or in this case, members of the Truck Loggers Association, are the last people in the world to be asking for a handout.

This made the remark at the final panel of the recent convention, by R. J. McKercher, of Millstream Timber Co., one which they sharply resented.

McKercher said they should take a good look at whether they are doing a good job because the requirement of tree farm licenses that logging contractors be hired for part of the work was "never intended to be a form of unemployment insurance for loggers."

We are sure no logger in the Squamish Valley, and possibly very few anywhere else ever regarded it in this light.

Loggers are a hardy breed. They may be accused of playing hard, but no one will say they don't work hard. And if our local Loggers' Sports is a sample of their play, they work hard at play too.

But certainly these men, who climb hills that would make the rest of us blanch, for a living; who spend their days in the open air and in all kinds of weather, fighting against the elements and doing a rugged job, should be the last ones to be accused of asking for handouts.

And that's what the remark intimated. That loggers are "goofing off" and not giving value received for their earnings.

To be absolutely honest, no firm, no matter how magnanimous it might be, is going to employ a contract logger unless he produces, and at the price which has been agreed upon.

Naturally prices must be negotiated; wages rise, certain fixed costs may change and this must all be provided for. But no large firm employing contract loggers is going to employ one just for the sake of giving him a job.

And we are sure the average contract logger gives good value for the monies he receives. To be realistic, he wouldn't be in business long if he did not.

He has to pay wages, and to do this he has to produce. He's probably buying equipment and has to make payments and keep the bank or finance company happy. They aren't if he isn't making the money. And he often works far harder than his men because he has all the worry of making ends meet as well as doing a day's work in the bush.

No, Mr. McKercher, we think the contract loggers are the last people in any industry to ask for a handout. And certainly a contract to log at a price which can be negotiated is not a handout.

Move over, boys, we're in your corner.

## Co-operation the key

Two of the leading news stories of the week stress the importance of co-operation in some phase of our woods programs.

MacMillan Bloedel's Squamish Division, which once again won the safety award in competition with the company's eighteen other logging divisions, was a triumph of co-operation between the men and management.

Representatives of the company and the industry's safety program stressed the fact that no one facet of the industry can earn such an award but that each man and each supervisor must work towards a common goal.

In the report on the Squamish Ranger District local Forest Ranger Tag Neighbor praised the co-operation of the logging operators who had rallied to the

assistance of the Forest Service when a fire threatened the Van-West logging operation.

"It was on the eve of a holiday when everyone was looking forward to getting away for the weekend, yet when the fire struck at 4:30 in the afternoon the response was immediate."

"Some companies," he said, "were on their way to the fire before we could contact them. And others responded immediately they were called."

"There was no griping about a lost holiday," he said. "Everyone was concerned in putting out the fire."

This is the type of co-operation which has always distinguished the men who work in Squamish and British Columbia's major industry.

## Feeding three for \$15

This should be interesting to all North Shore housewives.

A Toronto housewife recently made headlines that a family of three could eat well on \$15 a week. The opinion aroused several scoffers so Mrs. Cathrynne Armstrong, a mother of five, agreed to draw up a week's menus that would be based on proper nutritional values and actual super-market prices.

Mrs. Armstrong's food basket came to a total of \$14.58.

Here is what she prepared. Breakfasts included orange or tomato juice, hot cereal, eggs, toast and jam, coffee or tea — bacon on Sunday. Lunches are made up of sandwiches and soups from leftovers, plus fresh fruit.

For Sunday dinner she served roast beef, baked potatoes, turnips, rolls and apple pie. Monday: lamb patties, cabbage salad, creamed potatoes, ice cream. Tuesday: curried chicken wings, potatoes, frozen corn, fruit salad, peanut butter-cookies. Wednesday: macaroni

and cheese with sliced wieners, rolls, fresh celery, jelly, sliced bananas.

Thursday: liver and onions, baked apples, cookies, Friday: baked fish, carrots and celery, potatoes, canned or frozen fruit. Saturday: meat loaf, baked potatoes, harvard beets, ice cream.

Probably many wives would look at that list and sniff that such menus might be alright for some people, but their families certainly wouldn't like them. Father would expect any week's menu to include steak and ham and the kids like the occasional TV dinner.

Anyway, \$15 a week doesn't really buy anything. And since we are spending more all the time, the only thing to do is demand more from the boss.

Could it be that the old practice of trying to stretch the dollar is now considered pointless. Is this part of the reason why there are so many strikes in Canada today?

And since higher wages mean higher production costs, could it be part of the reason why prices keep going up?

## Pygmalion

West Vancouver homes do not generally sport an expansive aspidistra but in England they are the "in" plant this year.

So much so according to the National Geographic Society, which is attuned to such trends, that nurserymen are scrambling to fill orders for the broad leaf plant.

A carefully tended aspidistra has long been a fixture in lower middle-class English parlors. Why is it suddenly

putting on airs? Well, no sooner had the leafy plant popped up at a fashionable flower show than Mayfair decorators were deploying it here, there and everywhere.

What they seek, we suppose, is a touch of Pop in the Mod. Be that as it may, it couldn't happen to a more faithful species than the "landlady's lily."

There'll always be an aspidistra. More than likely an England, too.

## Oh, the bagpipe player is a musician...

Beauty being in the eye of the beholder, a lad with an ear for bagpipes can sense in their shrill a music that another might listen for in vain. It may or may not soothe the savage breast but it can overawe the too civilized emotions.

In any case, Defence Minister Hellyer has given the nod and the 900-odd bagpipe players in the forces have been recognized as musicians and their trade pay of \$20 per month re-instated.

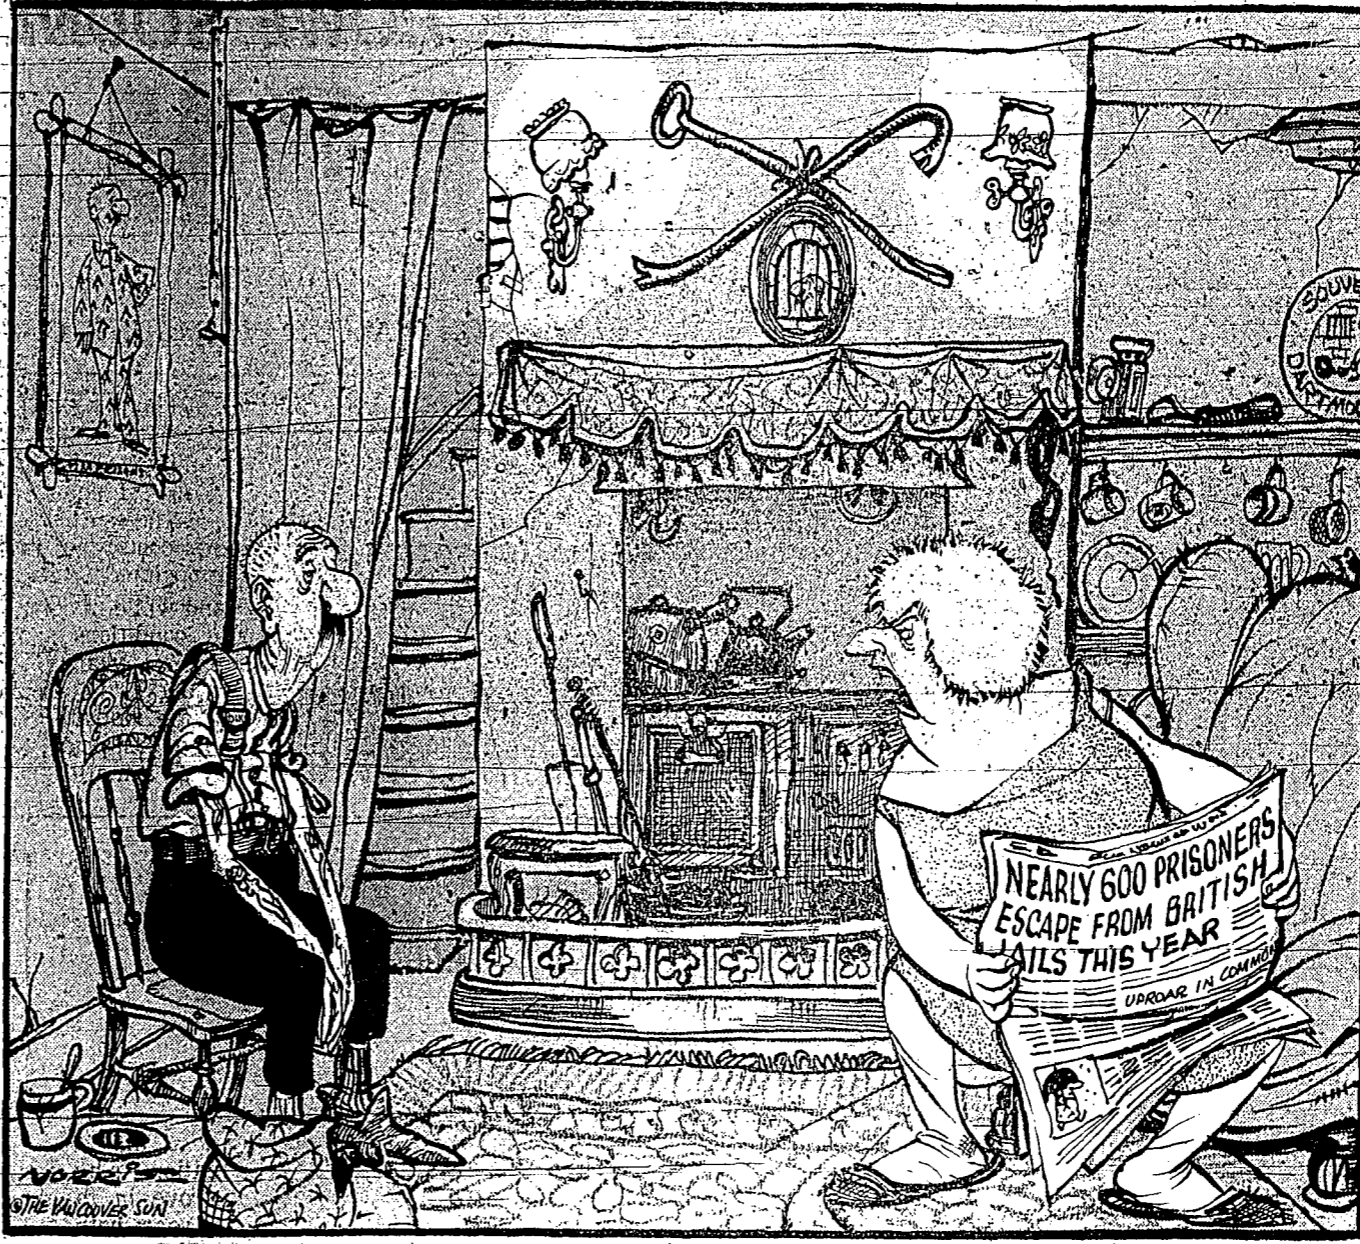

So the recognition of the pipes is a matter of more than commercial concern or musical moment. It touches too on

the exercise of power in its less subtle forms.

Bagpipes are a foreign instrument and most Canadians regard it much as the Russians do the electric guitar: loud but lusty.

But ordinary (which is to say, not Scottish) music lovers will feel that Mr. Hellyer is sincerely on the side of the bagpipe and on the side of music at the same time.

"Will ye gie us another march, Jock. We like 't'har some mair?"

"... an 'ow come you never even tried?"

## HOWE SOUNDINGS

Condition of the highway between Squamish and Britannia may be rather grim in spots but we do think the question asked the RCMP last week concerning the blasted corner north of Browning's Lake rather extreme.

Apparently they were startled last week to answer a phone query concerning the state of the highway. The question was "Can you tell me the condition of the Khyber Pass this morning?"

Spring may be coming to the lower mainland, and after a morning like last Monday (a week ago) who can doubt it? But it is still midwinter in the northern part of B.C. and a letter received by the local newspaper, which gets the damndest queries, demonstrates this.

The Dawson Creek Ranger company are planning to hold a spring tea next month and wish to sell bouquets of pussy willows at their tea. Naturally there are none in bloom at Dawson Creek at this time of year so they wrote the paper wanting to know if it would be possible to obtain three hundred pussy willow branches for their sale.

Well, you can imagine what I thought, but as I've always had a soft spot for Guides and Brownies, if you see me standing up to my knees in swamp water you'll know that I'm trying to fill their request.

I just wonder how many trees it will take to fill a request for three hundred branches.

That was on a par with the request from eastern Canada where someone wanted to know how to obtain the caulks to put into caulked boots so he could practice burling. He had seen examples of our boys on television and wanted to try it.

That one caulk to the post office and Harvey Hurrell turned it over to us. But, believe me, you do get the damndest requests.

Loved the remark made by one of our councillors last week and attributed to the reeve. "A speech should be like a bikini, brief enough to cover the essential points."

Just looks like it never will really stop raining for more than a few hours and, along with everyone else, I'm getting fed up with this continual liquid sunshine.

I'm sure we've had another foot of rain this month at least, and frankly I'm almost afraid to check and see what this month's rainfall is. I know we estimated last month's 22 inches at eighteen feet of snow, if it had all been snow, and if we had a foot in January it would mean more than five feet of rain in the past four months. That is well over half the annual rainfall in an average year.

No wonder Squamish and the valley is just a soggy mess and we squish every time we try to walk anywhere.

I really sympathized with one local merchant when he was asked how his shoe sales were last month and he retorted they were fine but he sure had a lot of trouble fitting shoes over all the webbed feet!

Did you ever see such a gorgeous morning as we awoke to on Tuesday of last week? During the night I had heard the wind howling and kept thinking, "We always get nice weather with a north wind," but rolled over and went back

to sleep again.

Then to look out early in the morning and see the mountains on the western side of the valley flushed pale pink with the rising sun and with Garibaldi like a huge ice cream sundae, topped with whipped cream in the northern sky, was almost unbelievable.

Even the smoke billowing up from Woodfibre didn't look quite so black and nasty.

Whitecaps dotted the sound and creamed along the rocks while a tug, bravely faced the wind with three barges in tow just like a duck with her babies strung out behind her.

The mountains on the island shone in the sunlight, the logged off areas on the west shore of

the Sound, thickly covered with snow, were glistening and in West Vancouver each tree on the ridge above the snowline was frosted with snow just as if it had been dipped in the thickest icing you could find. Coming along the upper levels highway you could see Mt. Baker and the Golden Ears, the mountains behind Haneey and along the Fraser Valley, usually obscured by smoke and haze.

It was a gorgeous morning. Even if it doesn't last it was still beautiful enough to make anyone feel winter and its rain just couldn't last forever.

A day at the small boat harbor recently when fishermen

were busy seeking the herring swarming there, made me realize just how much it means to city people to be able to get out for a day away from the crowded streets and bustle.

Most of the people were from the city. There was just the odd Squamish resident and I'm sure they were just watching more than catching.

Other interested spectators were the seagulls and they were swarming over the log booms, perched high on pilings and swooping over the water. They screamed continually, almost as if they were objecting to the people who were obviously poaching on what they considered their preserves.

## Founders of B.C.

# Robert Burns McMicking

Robert Burns McMicking was the man who brought the first public telephone service to British Columbia making Victoria the third city in Canada to enjoy the discovery.

He was of Scottish descent but he was born in Queenston, Ontario where his father also was

born. The young McMicking was barely 18 when he joined the "Overlanders," the pioneers who pushed their way overland to the west coast in 1862, seeking Cariboo gold. They travelled with saddle horses, mules, oxen and afoot — and eventually they descended the waterways of

B.C. by raft enduring hardships of the grimmest nature.

McMicking found the mines closing for the winter and he went on to New Westminster. While there he was recruited by the Collins Overland Telegraph Company which then was stringing its line across northern B.C. with the aim of reaching Asia and Europe via the Bering Strait. But the project was abandoned when a cable was successfully laid across the Atlantic.

McMicking remained as company agent at Quesnel, then moved to Yale where he married and soon transferred to Victoria to take charge of the Western Union Telegraph Office.

Here in 1878 he introduced the telephone, installing one set in his home, another in his office and a third in a newspaper office. This led to the formation in 1880 of Victoria and Esquimalt Telephone Company which today is the B.C. Telephone Company. He was manager until his retirement in 1914.

While in Victoria he served as a school trustee and an alderman and was a prominent Mason. In 1881 he was instrumental in the creation of B.C.'s first electric fire alarm system and in the creation of the first street lighting system in the city.

He died in Victoria in November 1915 and a plaque was erected there in his memory in St. Andrew's Presbyterian Church.

ROBERT BURNS McMICKING

## Forestry association sponsors poster contest

The 19th annual Canadian Forestry Association-Conservation Poster Contest went into full swing this week among art students from Grades 4 through to Grade 12. It is expected that over 45,000 students will take part in the contest which carries as its theme "The Prevention of Man-Caused Forest Fires."

Upon entering the contest the students have the opportunities of taking part, in not only the province-wide contest, but winners will be forwarded to compete in the National Forest Fire Prevention Poster Contest and the opportunity of an all expense trip to Expo '67 in Montreal and in addition, winning entries will also be submitted for competition against finalists from Western United States schools for International Honours.

This past year British Columbia received the grand prize in this contest as well as the majority of other awards. The provincial awards are made in each division, Senior, Junior and Elementary with first prize consisting of \$25, and a framed certificate, second prize \$15, and a framed certificate, 3rd prize \$10, and a framed certificate awarded to each division.

The contest deadline is April 7th.

## Mascot contest

They now have a school mascot at Brackendale. He is a black and white plush bear with yellow hair.

He attends all the interschool games and functions.

As yet the school does not have a name for the bear. All the students have been asked to submit names for the mascot and the best name will be given to the bear.

## Crest contest

Brackendale — The intermediate students have submitted designs for a school crest.

The best design will be chosen as the basis for a new school crest.

It is hoped the crest will be ready in about a month, as well.

JACK DAVIS

# Ottawa Diary

BIG THINGS ARE IN PROSPECT for the Port of Vancouver. Well on its way towards being Canada's busiest port, it is growing seaward as well. By the mid-1970's we will have both an outer and an inner harbour. The limits of our proposed National Port Authority will stretch all the way from Boundary Bay and Tsawwassen to Squamish B.C.

Until recently Vancouver lagged behind Montreal in tonnage terms. This year we will have caught up. And, by 1968, Vancouver should be the busiest port in the country.

Already handling more cargo than Seattle, Portland, San Francisco and Los Angeles combined it will be moving at least 30 million tons by 1970. Also, if its growth rate can be maintained, it should pass the 55 million ton figure reported for the Port of London Authority, by 1980 or thereabouts.

VOLUME IS ALL VERY well but efficiency is even more important. We have to keep our costs down if Vancouver is to continue to compete effectively with ports in other parts of the world.

Our rates are lower than those in Eastern Canada. Climate is one reason. Easy access to the sea is another. But, our port management can also take some credit for the fact that our rates are also well below those charged in Seattle and other West Coast ports in the U.S.A.

So far we have been able to handle ships drawing up to 40 feet of water. The First Narrows, I am told, can be dredged to 50 feet. But bigger ships of over 100,000 tons will have to go elsewhere. This is where an outer port in the vicinity of Tsawwassen comes in. With adequate dredging it could handle the largest vessels ever likely to move on the high seas.

Ten years from now our situation in the lower mainland area of B.C. may be similar to that at the mouth of the Rhine. This is where the world's largest port of Rotterdam is located. Almost totally rebuilt after World War II it looks after the needs of the northern Common Market countries. But even the Port of Rotterdam is becoming obsolete. Soon it will only be an inner port. As such it will serve the small and medium sized ships. Outside a huge, new deep sea port is under construction. Europort as it is called will eventually be the European terminus of the largest vessels afloat.

SHIPPING OF COURSE IS only one aspect of our overall transportation problem. We need suitable cargo marshalling areas. We also need proper rail and road connections. The movement of goods into and out of the Greater Vancouver Area, in other words, should move smoothly from the land to the sea and vice versa.

Ottawa has been quick to move in this connection. Transport Minister Pickersgill announced last November that the National Harbors Board was extending its responsibilities southward along Georgia Strait to the 49th parallel, and northward to the tip of Howe Sound. Studies have also been launched with a view to improving our railway facilities and improving our port access roads as well.

The National Harbors Board has \$100 million worth of new projects already on the drawing boards. Project Two Hundred means another \$200 million investment in the inner harbour. A new bridge or tunnel means another \$100 million and so it goes. Make no mistake about it, the Port of Vancouver is developing. From all appearances it is developing in the right way as well.

**DIRECTORS** of Mountain View Estates near Alta Lake are discussing sale of their 25 fully serviced lots each one quarter acre or more, along the highway. Prices start at \$3,150. Above are Horst

Anders, Rudolph Nosalek and Gunther Bosecker. Two other directors not shown are Gunner Vogel and Ronald Richard.

## Instant recovery in forest industry doubtful

Members of a panel on the future of the forest industry said that B.C.'s No. 1 industry, forestry, should be able to sell its normal volume of production; that credit in the next six months should be a little easier and that if people are postponing home purchase hoping for lower costs, they're going to be disappointed.

And while making a prediction that conditions should improve over last year, forestry executive L. L. G. Bentley warned that the industry needs a break in the cost-price squeeze, not only as a matter of survival but in order to create incentives for people who risk capital.

Bentley, senior vice-president of Canadian Forest Products Ltd. said: "Labor and governments have had their share, and I feel it is industry's turn to get a break. Quite simply, our profits must improve and our returns on capital employed must be higher."

His outlook for 1967 was quick and to the point: the housing situation should begin to improve in the second half of the year both in Canada and the U.S.

Then he went on to make a strong plea for his industry. The price cost squeeze, he said, has worsened materially during the last year. In fact over the last 10 years, prices for all main products such as lumber, plywood and pulp and paper have remained generally at the same level while average hourly wages have gone up 63 per cent and government stumpage has jumped more than 200 per cent on hemlock, which he said was the principal species for both lumber and pulp operations.

Wages in the industry in B.C. will be the highest in the world and capital costs for plant and equipment are compared to U.S. competitors are from 25 to 30 per cent higher, he said.

A. J. Ellis, general manager of Bank of Montreal for B.C. said 1966 was a pretty healthy year in spite of many troubles and said most signs this year point toward continued expansion, though at a more moderate rate than last year.

More detailed, he said the long-wide housing supply is getting tighter and when funds become more readily available, there will be a substantial increase in starts. There was an increase in the U.S. during December which was a good indicator, he said.

Ellis took time to defend the will be expensive in the decade ahead.

On lumber sales, he said B.C. producers should sell as much to the U.S. this year or more and other exports markets don't offer much promise. There isn't anything very bright showing for plywood but world markets for pulp, paper and paperboard will continue to expand this year.

## Plans for Festival of Forestry

Seven countries already have indicated their interest in participating in the first International Festival of Forestry during the 1967 Pacific National Exhibition from August 19th to September 4th.

The 14-day event will showcase loggers' skills in three one-hour shows daily, as they compete in 11 categories for prize money totalling \$36,000.

The Festival of Forestry will be divided into three main classifications.

The B.C. Novice Logger classification will be restricted to B.C. residents and only those who have never won a first place prize at logger's sports held at Sooke, Duncan, Squamish or the PNE. This contest will start on Opening Day, August 19th and continue on August 21st and 22nd.

From August 23rd to August 26th inclusive the second event, the B.C. Championship Logger classification, will be open to any B.C. resident.

The International Woodman classification is open to all competitors and will run from August 28th to the close of the 1967 PNE on Labour Day, September 4th.

The countries competing in this International category are hoped to be the U.S.A., Australia, New Zealand, Finland,

Russia, Sweden and Japan, although final confirmation has not been received in every case at this early date.

The 11 categories for contestants in the Festival of Forestry will include standing and horizontal block chipping, obstacle power saw bucking and straight power saw bucking, burling, speed climbing, spring board chopping, pole falling, axe throwing, and two hand-saw events, singles and doubles.

The seating capacity of the area, situated in the centre of Exhibition Park, is being increased to accommodate many more of the 210,000 people who last year watched and enjoyed the PNE's B.C. Centennial show, the Festival of Logging.

Additional information and entry forms for contestants can be received by contacting the Festival of Forestry Manager, Mr. P. G. (Pip) Martin, at Exhibition Park, Vancouver 6, B.C.

**GARIBALDI B.A. SERVICE**  
Fast service on all Lubes and Oil Changes  
7 a.m. to 9 p.m. 892-5515

## Appointment at Weldwood

Dave Milligan, formerly assistant personnel manager at Weldwood's Timberland division, has been transferred to a new position at Squamish.

He will become the personnel manager at Weldwood's Empire Lumber operation here.

Mr. Milligan replaces Gerry Spitz who has gone to Vancouver as labor relations manager for the Mechanical Industrial Relations Association.

## By hook or by crook

In feudal times all forests belonged to the lord of the manor.

The peasants were not permitted to cut trees, but had permission to secure for heating and cooking whatever underbrush, limbs, twigs, etc., they could reach by "hook or by crook"; i.e., what they could cut down with a pruning hook or pull down with a shepherd's crook.

This served the useful purpose of keeping trees stands clear of underbrush, dangerous in a fire, and of superfluous and dead limbs.

## Ranger

### jinx night

Come one! Come all! The 1st Garibaldi Land Rangers invite you to attend their Jinx night on February 22nd from 7 until 9 p.m. at the Manquam Elementary School.

Skits and short plays will be put on by the Brownies and Guides of the district, who will be competing for a prize.

Fudge will be sold by the Rangers before the show and during the intermission.

Tickets are on sale from any Ranger and will be sold at the door.

The admission is: Children 10 cents, Adults 25 cents.

## Reforestation

(Continued from Page 1)

Planting was done at high elevation and this has to be done in the fall. Mr. Neighbor explained they cannot be planted in the spring as the snow often does not leave these elevations till June and there is not sufficient time for the roots to become established before the hot weather comes and the seedlings are killed.

Seedlings stand a much better chance of survival in the fall when, if a severe frost does not come too early, they then become established before the cold weather.

The trees were planted outside the Tree Farm Licence with approximately 150 acres planted in the Stawamus, Diamond Head and South Mashiter accounted for another 150 acres while the remainder were planted at Rubble Creek near Garibaldi.

### HIGH SEED PRODUCTION

1966 was a high seed cone production year and crews worked during the fall at the 1500 foot to 3200 foot level gathering seed. The largest amount came from the Base Camp area with a small amount from Daisy Lake and 19 Mile Creek.

Mr. Neighbor said seedlings from these cones will be ready for planting in 1968. Seed from Douglas Fir trees grows in cycles, with a heavy cone crop occurring about every thirteenth year. Last year's crop was urgently needed as seed stocks were very low.

There was also a good crop of cones from the seed production area at Cat Lake but the ranger said fertilizing had made no apparent difference in last year's crop. He felt fertilizing was only of use in a year when stocks might be expected to be poor.

Many factors affect cone and seed production. Insects and climate play a great part in the amount of cones produced and the quality and quantity of seed. The department keeps a close check on the cone crop in the weeks before they ripen.

### PREVENTION PROGRAM

Mr. Neighbor said he had been particularly pleased with the success of the Squamish Protective Organization in which the Forest Service and local operators work together when a fire threatens.

The district is divided into four zones; the T.F.L., Garibaldi to Alta Lake, Squamish Centre and the Howe Sound area.

The aim of the prevention program is to provide fast initial action, an effective fire control organization and to equalize the fire fighting load of the operators and the individual.

This had worked very well and he complimented Mr. Carradice, the former forestry officer who had instituted the program.

"When we were faced with a fire at VanWest's logging show just before the Labor Day holiday, the response was amazing," he said. "Men and equipment were immediately available."

"Squamish Mills crews were immediately made available, the Alta Lake fire department rushed to the scene, Valleau Logging were on the way to the fire before I reached them by telephone and MacMillan Bloedel placed tankers at our disposal."

"The response was overwhelming. Co-operation from everyone concerned was wonderful. We couldn't have asked for more assistance."

### CHRISTMAS TREES NOT A PROBLEM

The Christmas tree program was very successful with the cut of about ten percent of the preceding year and very few illegally cut trees. These were picked up by patrols.

Approximately 240 trees were cut in trespass with 107 from commercial cutters caught at the time. The balance were cut by individuals but the loss was very small compared to the previous year when it was estimated 30,000 trees had been illegally cut. The 1966 figure is less than one percent of the preceding year.

Mr. Neighbor said the program of telling the public about the ban through the medium of radio, television and the newspapers had paid off. In addition a patrol system backed up the publicity but he added "I am sure the education did far more good than the patrols."

The Squamish Ranger District is staffed by Ranger M. N. Neighbor, Deputy Ranger Elwood Foulds who recently came to Squamish from Pemberton, Vancouver and Mission; Assistant Ranger Les Anderson from Lund, Gordon Prest, who is away on a three months training course and will be back in the spring, and Lorne Scott, dispatcher, Doug Campbell, who was stationed here is also in Vancouver taking a special course and will remain in Vancouver until going to ranger school later in the year. He has been transferred from the Squamish district.

Brook Kiltfoyle is expected to return to the lookout at Stawamus this summer and another lookout man will be stationed at Artaban on Gambier Island.

Mr. Neighbor reported that there were only two weekends when his department showed concern regarding the influx of tourists to this area. These were during the Vancouver Sun Derby and the Labor Day weekend. Highway patrols and helicopter patrols of the area were instituted and a water bomber was standing by at Vancouver airport for use in an emergency. Two mobile tankers were also available, one at Alta Lake and the other at Squamish.

Mr. Neighbor said the increasing popularity of the Alta Lake area during the summer could create some problems on a busy weekend when campers and hikers were present in great numbers.

## Work progressing on highway

Winter weather has not caused too much of a slowdown on work on the relocation and reconstruction of the Squamish-Britannia highway.

Much of the area to be reconstructed has been cleared of trees and burned in preparation for the moving in of heavy equipment.

The road is closed for several hours on at least two days of each week when blasting takes place. To date a great portion of the rock face on the high bluff north of Browning's Lake has been removed and the rock is being used to eliminate some of the curves on the long hill to the north.

Work on the hill south of the MB camp is also proceeding and crews have started to work

on the hill near the forestry station. Drill crews are busy at various other spots along the highway where further blasting will take place.

Traffic has not been too badly disrupted by the construction with most people fully aware of the times when the road will be closed and planning their trips to the city to coincide with the open periods.

Huge earthmoving machinery is busy at the MacMillan hill and this portion of the road will be straightened out, climbing directly up from the camp and not curving back towards the Chief as the road does at present. The stretch at the foot of the hill will also be raised above the valley floor and straightened out.

## UBC group tours Britannia mine

Seventeen members of the Mining Engineering Club of the University of British Columbia were taken on a tour of the underground operations of the Anaconda Company (Canada) Ltd. on January 20th.

The group, under the guidance of Anaconda engineers J. Greer, P. Rowan and M. Fichauer, were shown typical mining operations such as hoisting ore, trucking, stopping and ore transportation. Members of the party were able to secure, on site, various mineral specimens to add to their collections.

The tour covered the 4100 foot level, 200 feet above sea-level and two and one half miles into the mountain, down to the 5700 foot level, 1500 feet below sea-level. The group entered the mine at 9:30 a.m. and returned to the surface at 1:30 p.m. Paper bag lunches were carried and eaten en route.

Upon arrival at the surface, the group was met by Professor Henry Howard and four more

members of the club. The augmented party, under the guidance of Mr. A. T. Smith, was shown surface operations consisting of the powerhouse, the mill, maintenance shops, and the copper plant where copper metal is recovered from mine waters and the engineering offices.

The tour was arranged in line with the Anaconda policy of co-operating with the University of British Columbia and the B.C. Institute of Technology in the training of future engineers and technicians.

**THE NEW YEAR BRINGS HOPE FOR THE SICK**

Unfortunately there still are some ailments which are presently incurable. Many former killers have been conquered and it is only a matter of time until the rest will be overcome.

Research scientists and pharmaceutical chemists are devoting their lives to this purpose. Meanwhile, each year brings new drugs, that alleviate pain and distress, so that the patient can live as comfortably as possible. As soon as new medicines are released we stock them. Do not despair if any member of your family seems hopelessly sick. Any day, a new discovery may give the needed help.

**YOUR DOCTOR CAN PHONE US** when you need a medicine. Pick up your prescription if shopping nearby. A great many people entrust us with their prescriptions. May we compound yours?

**High school highlights**

**Basketball season now in full swing here**

by **LOUISE KILBY**  
Many thanks to Bob McKilligan of Overwatera who donated candy bars to the Expo Kids to sell at their show on Friday January 20 and Saturday afternoon, January 21. Also thanks to the Squamish Taxi office who donated a table lamp for the students to raffle and Mrs. Haffey for the jade pendant. The lamp is on display in the Squamish Times Office and tickets may be bought at that office or from any Expo Kid.

Well the basketball season is in full swing. On Saturday night January 21 the junior and senior boys teams and the junior girls travelled down to play a return game against St. Thomas Aquinas. Junior boys played first, losing with a score of 40-31. The next and most exciting game of the night was the senior boys. Final score of this game was 60-39 for our team.

Roy Clarke was the high scorer of the evening with a total of 23 points. Next was Roger Douglas with 21 points to his credit. The junior girls lost their game with a score of 26-8. Elsie Albrecht was high scorer of the team with 4 points.

**Social Notes**

Mr. and Mrs. W. J. Boscarion and Mr. and Mrs. Harold Halvorson are holidaying in Reno.

Our sympathy is extended to the family of the late Roy McNamee on their loss of a loving husband and father.

Mrs. Z. Spears of Penticon has been visiting her brother and sister-in-law Mr. and Mrs. Ross Barr.

Mrs. Tom Moore of Manning Park spent a few days with her parents Mr. and Mrs. D. H. Campbell last week.

**Richard Englund heads Teen Town**

Pemberton-Teen Town held its election night on Monday January 23rd at the community hall with 35 teen agers present. Teen Town will be sponsored by the local Lions Club. Elected for 3 months terms was Mayor, Richard Englund; Deputy Mayor, Tom Lewis; City Clerk, Margie Jensen; City Engineer, Brent Pipe and City Treasurer, Eldon Talbot.

Priest is Social committee chairman. Coming events for the year were discussed at this meeting. The club is open to young people from the ages of 13-20 years and will hold regular meetings at the hall every second Monday and executive meetings on the other Mondays, beginning at 7:00 p.m.

**EXPO NEWS**  
On Friday, January 20 Cathy Francis (Transportation Co-ordinator); Louise Kilby (Head two of the parents' travelled Co-ordinator); Mr. Baldry and down to the CNR station to arrange transportation for the students going to Expo. They put in an application but will not know if they will be travelling by berths or day coach until the agent phones. While in Vancouver the group visited the Expo office in that city and talked with the woman in charge there. She gave them a large map of the Expo fair site and many pamphlets containing information on the fair. Students will be able to see these on the Expo News bulletin board in the school.

**Red Devils win at 100 Mile**

Pemberton — The senior girls and boys of Pemberton Secondary School and 100 Mile House played two basketball games on January 19th at the high school to a fair size audience. In the first game the girls played with 100 Mile House being the winners 24 to 13. High scorer for the visiting team was Lynn Berkley with 12 points, and for the home team Linda Miller with 6 points.

Grade eleven girls have reached an interesting part in their physical education class. They are being taught Creative Movement by Karen Thompkins who is doing this as part of her Community Recreation Course. The main object of this is to become another object in life and act like this object. So far the girls have become fire-crackers, fish, and plants. As yet they are only at the beginning of the course and will use music when they advance. Sound crazy and fun? It's both.

**SQUAMISH Bulletin Board**

## SULLIVANS TO MARK GOLDEN WEDDING

Mr. and Mrs. Andy Sullivan will celebrate their Golden Wedding anniversary at an Open House on Sunday, February 5th.

The Open House will be held at the home of their son-in-law and daughter, Mr. and Mrs. R. S. Bishop, 3441 Vista Crescent from 2-4 p.m. and 7-9 p.m.

## United Church annual meeting

The congregation of Squamish United Church gathered in the CE Centre on Sunday evening January 22 for the Annual Congregational Meeting.

As a fellowship dinner had been held just two months ago, the meeting took the form of a pie and coffee klatsch. Members were advised to skip their regular Sunday evening dessert, come to the Centre at seven p.m. and partake of apple pie adorned with whipped cream followed by a cup of coffee prior to the business meeting.

The work of the church and its various allied activities for the past year was reviewed and proved most gratifying. Although there is still a fairly heavy debt against the new building the amount is gradually being whittled down.

All branches of church work showed spiritual progress and financial success. Proudest achievement of the year was the acquisition of a new manse, the former Walton residence on Depot Road, followed by the sale

of the former manse on Fifth Street. The UCWO has undertaken the completion of the new manse and while much has already been accomplished more work is under consideration by the ladies.

A budget for the current year was presented by the treasurer Doug Rudy and accepted by the congregation.

Mr. A. L. A. Hankey was re-elected to the Session and Harold Kyle and Sidney Pudney are new appointees. W. Boscarol and D. Rudy were re-elected to the Board of Stewards and Paul Newson is the new member.

Ed. Antosh moved a hearty vote of thanks to Rev. and Mrs. H. Wingfield for their continuing work in the Squamish United Church and the hope that many years of worthwhile co-operation lie ahead for the minister and the congregation.

Following the meeting those present enjoyed the remainder of the pie and coffee.

## Civic dinner at Totem Hall

Highlight of next week will be the Civic Dinner on Wednesday evening, February 8th in the Totem Hall when members of the various civic bodies will give an account of their activities in the past year.

The dinner is sponsored by the Squamish and Howe Sound District Chamber of Commerce and members of the Chamber, the municipal council, school board, Hospital Board, Hospital Improvement District, Lions, and Rotary Clubs along with representatives invited from Pemberton and Whistler Mountain will meet.

Willard Ireland, Provincial Archivist, will be the guest speaker and all who have heard him speak say it is an experience which should not be missed.

The Good Citizen Award will be presented and it is hoped last year's recipient, T. B. M. Fougberg, will be able to make the presentation.

Tickets to the dinner may be obtained from Mr. D. E. Rudy in his office in the Elliott Building.

berton and Whistler Mountain will meet.

Tickets to the dinner may be obtained from Mr. D. E. Rudy in his office in the Elliott Building.

## Wildlife show on Friday Feb. 3

Squamish Valley Rod and Gun Club is sponsoring a wildlife show in the high school auditorium on Friday, February 3rd at 8 p.m.

The film, taken in northern B.C., Alaska and the Arctic will feature pictures of the Barren Ground grizzly and the breakup of the huge Arctic glaciers as well as shots of migrating caribou.

Moose, mountain goat and sheep and many of the smaller animals living in the north country are shown in the dramatic sequences which outdoorsmen say are among the best of their kind.

The two hour show is packed with action, from a seal hunt with Eskimos by dogsled, to photographs of polar bears from a distance of thirty feet. Giant Kodiak bears feeding on migrating salmon are also shown in the film.

Tickets for the show are available at the Squamish Times, Brock's Sporting Goods, Valley Hardware, Brackendale Store, Rod and Gun Club members and at the door.

Proceeds from the show will be used to further the fish and game club's conservation program.

## Pageant and ball at Pemberton

The Pemberton Secondary School is holding a Centennial Pageant and Costume Ball on Thursday, February 16th at the High School.

The pageant will consist of 26 historical scenes, with authentic music, and costumes of the times.

Muskets and tomahawks for the pageant will be made in the school shop.

David Codville, Social Studies teacher is directing the pageant with the assistance of principal George Hayes.

On Saturday, February 4th, costumed school students will be around town selling tickets, so please support your students as this is one of their projects to assist the financing of the 21 students who are planning to go to Expo 67.

### Engagement announced

Mr. and Mrs. Gunnar Gimse of Birken, B.C. wish to announce the engagement of their daughter Katherine Patricia (Pat) to Mr. Dennis Asher of Pemberton, son of Mrs. E. D. Asher of New Westminster and Mr. D. P. Asher of Port Alice.

Date of the wedding will be announced later.

Music for the costume ball will be featuring the popular orchestra "The Lamplighters".

Admission for the Pageant and Ball plus a buffet supper will be \$5.00 a couple for adults and \$3.00 a couple for students. So come on everyone lets support our students and teachers who are putting a lot of time and effort into this affair.

Mr. and Mrs. Jack Graham are also holidaying in Hawaii.

Mr. and Mrs. Tom Allen have journeyed to Hawaii for a few weeks holiday.

Mr. and Mrs. Jack Graham are also holidaying in Hawaii.

Mr. and Mrs. Jack Graham are also holidaying in Hawaii.

Mr. and Mrs. Tom Allen have journeyed to Hawaii for a few weeks holiday.

## Darlene Erickson feted

Mrs. Melvin Erickson, whose former Darlene Ryan, whose marriage took place on January 14, was the guest of honour at a miscellaneous bridal shower held at the home of Miss Leslie McKinnon on Wednesday evening, January 18th.

In the dining alcove of the McKinnon home streamers of pink and white joined with silver bells, hung over the table piled high with gifts for the new bride. Some thirty guests, most of them young friends of the new Mrs. Erickson, enjoyed a period of enjoyable games followed by the presentation of the gifts to the guest of honour. Bows and ribbons were used to fashion an attractive hat for her.

Refreshments and socializing brought the evening to a pleasant close. Assisting the hostess for the event were Miss Cherie Kyle, Miss Janet Erickson and Miss Lynda Dickie.

### Social notes

Congratulations to Mr. and Mrs. Mervin Casey on the birth of a daughter weighing six pounds thirteen ounces at the Squamish General Hospital on January 20th.

Mr. and Mrs. R. E. Gordon spent a recent weekend at Parksville attending the Conference on Evangelism.

Oops! Sorry but Mary Wingfield is attending the Nanaimo Vocational Institute not the one in Vancouver.

Our sympathy is extended to the sons and daughters of Mr. Alexander Fowler who passed away after a very brief illness.

Mr. and Mrs. David Means and their children have moved to Lillooet.

Mrs. Ruby Cole has returned from a visit with her son-in-law and daughter at Williams Lake.

Ken Jamieson has come from Beaver Cove for a lengthy visit with his mother Mrs. Emily Jamieson.

Mr. John Franson of Lillooet spent a few days with his son-in-law and daughter Mr. and Mrs. Brian Buckley recently.

Our sympathy is extended to Mrs. Fred Eadie on the death of her father.

### Celebrates 8th birthday

Pemberton-On Tuesday, January 24th little Kenny Pickell celebrated his 8th birthday with a supper party, followed with ice-cream and birthday cake which was made in the shape of a turtle.

Attending the party were Bert Perkins, Collin Priest, David and Joe Taillefer.

Unable to attend because of measles was Scott Allen, Nicky Antonelli and Terry and Kelly Ross.

### Baptist Church annual meeting

The Squamish Baptist Church held their annual meeting and church dinner at the home of Mr. and Mrs. Howard Gebhart on January 20th.

A delicious hot casserole dinner was served, followed by the annual business meeting and election of officers.

All were encouraged by the growth in every aspect of the work during the past year.

### Around Pemberton

Mr. and Mrs. Tom Allen have journeyed to Hawaii for a few weeks holiday.

Mr. and Mrs. Jack Graham are also holidaying in Hawaii.

### RAED'S NEWS ADULT EDUCATION

Photography - Vic Bopp is now enrolling interested persons in the photography class, in the Howe Secondary School, room B104, at 7:30 on Thursday nights. We need a minimum of 10 people to run this class at a cost of \$8.00 per person. Learn how to take better colour pictures.

Spanish - Miss Estrada has started the Spanish classes again, but it would appear that some of her students do not know the classes have started again (It's school time students), if anyone else is interested in learning Spanish, go to the Howe Sound Secondary School, at 7:30 on Thursdays, in room A204.

Public Speaking, Dinners Club - We are now in the process of trying to start a Public Speaking Course for the business man and interested parties, on Mondays at noon. Rev. H. Wingfield will be doing the honours by imparting knowledge on public speaking to the guests, while lunch is being served. Do not think that by eating you will get the job of speaking on any topic that may come along and enjoy doing it. Further information of this course will be published in the near future, keep watching.

Art Class - The Art Class is now in full swing in the Howe Sound Secondary School, under the capable hands and direction of Mrs. Ingraham. If you think you would like to paint, sketch, or draw, go to the school on Monday nights at 7:30, cost is \$5.00 per person.

## FEBRUARY RITES FOR JUDY FAIRBANKS

Mr. and Mrs. J. Allen Fairbanks announce the engagement of their daughter, Judith Arlene to Robert Edmond Rotherberger, son of Mr. and Mrs. Artman Rotherberger of Prince George.

NEW OFFICERS FOR SQUAMISH OAP

At the January meeting of the OAP the officers for the Centennial Year were elected as follows: President, W. J. St. Laurent; First Vice-president, J. Castle; Second Vice-president, Mrs. D. D. Morrison; Secretary-treasurer, Mrs. W. H. Ridgley; Programme, J. Nelson; and Refreshments, Mrs. A. Moon and Mrs. J. M. G. Hurren.

Two resolutions from TLA conference

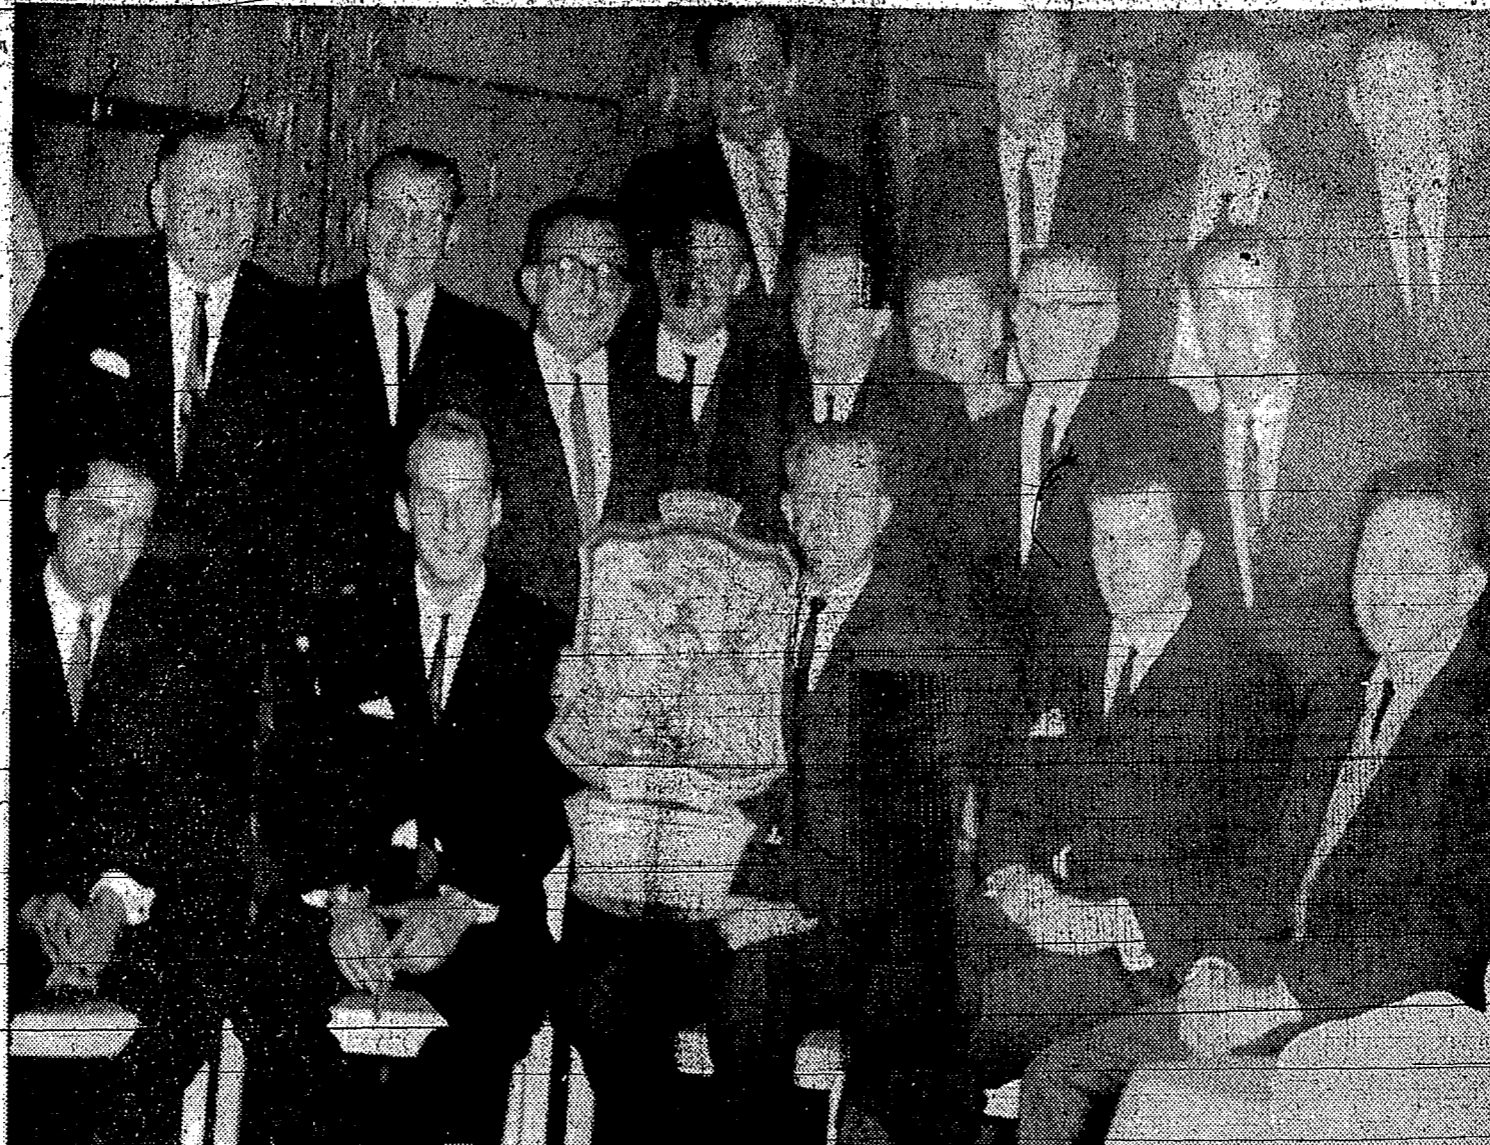

Two resolutions affecting the logging industry were passed at the recent Truck Loggers Association convention in Vancouver last month. The resolutions deal with stumpage appraisal and contracts with independent loggers.

Trees and climate

In areas which have a low annual rainfall the forests develop open stands. We can compare for example, the open parklike forests of yellow pine, which are characteristic of the dry belt of the interior of British Columbia, with the dense, almost jungle-like spruce-hemlock forest of the northern coastal region where the annual precipitation often exceeds 200 inches.

Business licence may be changed

Council last week discussed the implementation of special legislation to prevent the annoyance of book salesmen in particular and others who may become a nuisance if their actions are not curtailed. The present bylaw is not strong enough and in the view of recent reports concerning a saturation campaign by a number of book salesmen who were extremely persistent, council felt much stronger legislation should be enacted.

SAFETY Committee winners with the MacMillan Bloedel Safety Award which they received for the second consecutive year are shown here. Eric Strom, Safety Committee chairman holds the award and with him are: G. Anderson, R. Barreau, D. K. Belle, A. E. Bernier, D. Boyd, R. Bruce, W. Connolly, M. Davis, L. F. Dent, H. Dubeck, E. L. Kristianson, A. MacDougall, S. MacPherson, E. Stoth and fire warden R. DesJardins.

A fantastic accomplishment

Squamish wins safety award for second year

The Squamish Division won the MacMillan Bloedel safety award for the second year in a row and H. R. Chisholm, general manager and assistant vice-president, logging group, in making the presentation to Eric Strom, chairman of the Safety Committee, said it was a fantastic accomplishment.

"This is one of the toughest and roughest shows the company is logging. Most people would consider it most hazardous," he said. "You have consistently shown the rest of the company's divisions, all 19 of them, that this doesn't make any difference."

"It's not age or experience," he added "Which solves problems. Even with tough conditions, a new operation and a new crew, you have almost completely eliminated accidents. You have proved you can log efficiently and at low costs and still not have accidents."

"It is the attitude that counts," he said "Squamish has that attitude and you have proved it with your efforts. We will try and instill in our other operations the teamwork which you have shown here."

He said Squamish is considered the company's model operation and they send many of their most important visitors here.

He said he was happy to present the award to Squamish for the second time and with the co-operation of management and the employees, was looking forward to doing it again next year.

Stressed co-operation "Scotty" Ellison of the B.C. Loggers Safety Council, stressed co-operation as the key to safety saying "The company does not want accidents, nor do the men. The award was not won by the Safety Committee, supervisors or any one group, but by the entire division."

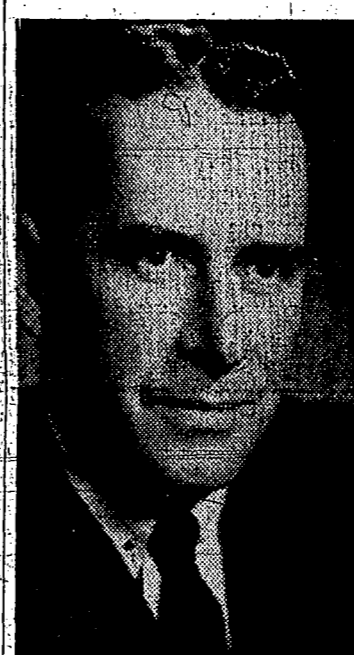

A. E. "Barney" Bernier, general foreman for the company, thanked Mr. Ellison for his assistance, the safety committee members, foremen and all those who helped to achieve this record.

Division manager Les Rush was master of ceremonies and in his introductory remarks said the company had three accidents in 1966, the same number as the preceding year, but the accident frequency record was lower in 1966 when there were more hours of exposure. He said they were difficult hours

HONORED AT BANQUET

Members of the Safety Committee were guests of honor at a Paradise Valley Resort on Wednesday, January 25th. Company officials came from Vancouver and the Island to mark the presentation of the award. Members of the committee were seated at the head table. They were Eric Strom, chairman; G. Anderson, R. Barreau, D. K. Belle, A. E. Bernier, D. Boyd, R. Bruce, W. Connolly, M. Davis, L. F. Dent, H. Dubeck, E. L. Kristianson, A. MacDougall, S. MacPherson, and E. Stoth. R. DesJardine, fire warden also attended the dinner.

Out of town, visitors who attended the dinner besides Mr. Chisholm and Mr. Ellison were G. W. Hall, logging production manager for MacMillan Bloedel; D. B. Turner, manager of logging operations for the company; S. P. Garrison, manager of engineering and development for MacMillan Bloedel and J. A. Brown, accident control co-ordinator from the company's Vancouver office.

RALPH A. BARNARD Exec.-Sec. B.C. TB Society

Ralph Barnard BC T.B. Society Exec.-Sec.

Ralph A. Barnard, 50, B.C. Tuberculosis Society president the past two years, has been named executive secretary, as of February 1st. He replaces Doug Geekie, who joined the Canadian Medical Association in Toronto late last year. Mr. Barnard, the unanimous choice for the post over many applicants, has been an active worker in the TB battle for close to 20 years. He began as Seal Campaign chairman in West Vancouver in 1948, and has served on most of the Society's committees, being secretary-treasurer, vice-president and president.

Opinions aired at forestry panel

Widely divergent opinions were aired at the panel "Publicly Managed Forests" held at the first afternoon session of the B.C. Truck Loggers Association convention on Wednesday January 18th. Ian S. Mahood, of Mahood, McKercher & Associates, said the government take is too much but Lands and Forests Minister Ray Williston denied this, saying the industry shouldn't lay the blame for all its troubles at the government's doorstep.

He said the provincial government has offered financial incentive to the industry to the greatest degree consistent with a fair balance between the interest of the industry and that of the general public. Mahood said the explosion of costs reflects in a large part the impact of government regulations and charges on the raw materials and the tools of production required by the industry. He added that there is cause for concern that despite the spectacular increase in the B.C. Forest industry, lumber and its product may be priced out of foreign markets.

EARNINGS DROPPED He said the rate of earnings of the forest industry had been steadily trending downward in the past ten years and this is the reverse of most major Canadian industries.

He said increased costs of labor, machinery, supplies and services had not been offset by a rise in prices, but a close examination of operating costs showed that the costs had been offset by new methods and increased efficiency.

He blamed the combined governments for the downward trend, saying that all three were to blame and not just one. Government collections from the industry had increased \$33 million or more than 25 percent in two years, while sales income had increased by only \$50 million or 5 percent.

The demands of government have outrun the gains in sales and at the same time outrun the increase in wages obtained by organized labour, he said. He also asked if investors and workmen in the industry must accept reduced returns while competing governments claim an unreasonably high share of the hard won sales generated by private industry in foreign markets.

CAUSED BY OVER SUPPLY He also said the current slump in log prices, is a direct result of oversupply brought about by inability to sell their products. This in turn is a reflection of costs of production, affected greatly by government policies, including stumpage payments. The forestry minister in his turn denied these arguments, saying it was not the fault of the government that there were too many logs, but rather they were produced to beat the band in order to stockpile them in case there was an IWA strike last year.

The production had no relationship to the market in which we were doing business. You were producing because a strike was expected but there was no strike and no shutdown because of fire season. "Now you are trying to pick a scapegoat."

He also stated the direct revenue from forest in B.C. stumpage very decidedly had dropped and that the government was running about one million dollars behind the stumpage returns of the previous year for the same period. RE-ASSESSING STUMPAGE Williston brought good news to the convention and said his department is taking a good look at the method of assessing stumpage. He said he doubted if the present method of assessing stumpage could be used much longer and that they had been working on the problem of appraising to the end products such as pulp, paper or lumber.

He said they were working on the problem of providing for the fluctuation of stumpage with market prices and said it now appears that it will be necessary to switch to a schedule based on \$5 changes in log selling prices in order to obtain more sensitive and positive results. Williston said forecasts for the immediate future point to a healthy forest industry in 1967 with pulp and paper production the stabilizing factor.

Pity the wapiti

"Monarch of the glen", lord of the wilderness, king of the Red Deer tribe, is the Wapiti (Elk). The antlers are the most magnificent trophies yielded by any of our American game animals, save the single possible exception of the grant Alaskan Moose.

Even so, the length of the horn of the Wapiti, with its wide graceful swoop, long lines, massiveness and symmetry, is more admired and desired by many than the huge, heavy antlers of the Moose.

That great hunter, Col. Theodore Roosevelt, classed it as the grandest of the deer kind throughout the world. The full-grown Wapiti is normally of twelve times. The cow grows no antlers, differing in this respect from the Caribou cows.

The history of the Wapiti is a repetition of that of the Bison — persistent and ruthless slaughter by man. In former times it was found over practically the whole of the American continent. In 1849, in the great valleys of San Joaquin in California, bands of Wapiti numbering thousands roamed like cattle. Today it is confined chiefly to the Province of British Columbia.

ERIC STROM, head of MacMillan Bloedel's Squamish division safety committee holding the award which his group has won for the second straight year. With him are H. R. Chisholm, left, general manager and assistant vice-president in charge of log production and Les Rush, Squamish division manager.

ANNOUNCEMENT

Squamish Valley Rod & Gun Club PRESENTS Tommy Tompkins WILDLIFE SHOWS An exciting Wildlife Motion Picture Show for the whole family! - Don't Miss It! Friday, February 3 at 8:00 p.m. in the HIGH SCHOOL AUDITORIUM Tickets: Adults \$1 - Students 50c - Under 12 25c Tickets available: The Squamish Times; Brock's Sporting Goods; Valley Hardware; Brackendale Store; Rod & Gun Club members and at the door.

DESPITE rain and cold, hundreds of people turned out to spend a Sunday catching herring at the small boat harbor in Squamish. They lined the

pier and floating docks, crowded the boats and swarmed over the area.

## Alta Lake Ripples

The permanent residential population of the Alta-Lake area is now comprised of over one hundred people. This area extends from the south end of Green Lake to the base of Whistler.

Brian Rowley has resigned as manager of Gariball Lifts Ltd. His position has been taken over by David Matthews who has been working with the ski school as an instructor.

Latest road reports from Victoria indicate that other than completion of the legal access to the south end of Alta Lake, no further construction of the road around the west side of the lake will take place this year.

On the north side of Alta Lake private developers will have their road finished this year.

There will be a meeting of the Alta Lake Ratepayers Association on Feb. 5th at 10 a.m. It will take place at Mount Whistler Lodge.

## Expo trip costs climb

The higher rates and higher wages coming along, since the idea of having the Howe Sound secondary students make the trip of Expo 67 has upped the cost to each student practically 50 per cent and as a consequence the parents are getting together to try to find ways and means to raise the additional funds to assure that each student will still be able to go.

Various ideas have been suggested and will be gone into in the coming weeks. The youngsters themselves will be available for odd jobs to help earn their spending money, so if you have any odd jobs please phone any of the under named students, Brenda Trace, Shawa Kirby, Eric Pollish, Jeanette Lindley, Daphne Bavers to c.k. Bob Boys, Kerry Anderson, Sharon Smith, Herbert Wagner, Roy, Eliassen and Janet Clark.

This trip will be a wonderful experience for them, educationally and entertainment wise and something that they will never again have a chance to see, so it would be just too bad if, because of lack of funds, any of them have to forego the trip. So let's get behind them in all their endeavors.

Ninety-four students hope to go from Howe Sound Secondary school (11 of them from Brit. Beach.)

## What's cooking

# Winter sunshine in recipes from abroad

by POPPY MCKENZIE

"This time of year you may in me behold the wish for climes more sunny and less cold."

Excuse, please — and not that we have any real right to complain — but still, this is the time of year one envies those forethoughted types who planned a winter holiday in Mexico, Hawaii, Southern California or the Caribbean.

Seems to me as though every year more and more of my foolish to leave West Vancouver in the good old summer time — but not a bad idea at all when the rains pour down.

Well, if we can't join the sun-seekers in reality, we can in spirit, like by having a Hawaiian luau at home or serving something reminiscent of the warm countries.

Today, I'll pass along a few exotic recipes from such places. We won't talk about a luau, but first off to the Caribbean for these recipes from Haiti.

### GOLDEN CHICKEN

- 1 three to 3½ lb. fryer, cut up
- Juice of 2 limes (about ¼ cup)
- Juice of 1 lemon (about ¼ cup)
- 1 clove garlic, crushed
- 1 tsp. dried thyme
- 1 tsp. salt
- ½ tsp. pepper
- ¼ cup white wine
- ¼ cup butter or margarine

Place chicken in pie plate. Combine juice of limes and lemon, garlic, thyme, salt, pepper and wine; pour over chicken.

Let chicken stand in refrigerator one to two hours. Start heating oven to 425 degrees. With fork, lift chicken out of marinade and arrange in one layer in greased shallow open pan. Dot with butter.

Bake 30 to 40 minutes or until

**FURNACE INSTALLATION**  
Ph. 892-5392 Squamish  
and REPAIRS  
**TONY VISONA'S**  
HEATING SERVICE

fork tender, turning and basting chicken every ten minutes. Spoon any pan drippings over top.

Makes three or four servings.

### SAVORY RICE AND MUSHROOMS

- ¼ lb. fresh mushrooms
- 2½ cups hot water
- 1 tbsp. salad oil
- ½ lb. diced lean pork
- 1 tbsp. snipped scallions
- 1½ tsp. salt
- ½ tsp. dried thyme
- 1 clove garlic
- 1 green pepper
- 1 cup raw white rice
- 3 frankfurters

Cut up mushrooms into bowl and pour on hot water. With one hand, squeeze mushrooms in water to make water dark colored.

Now, in skillet, heat salad oil; add diced pork and salt pork. (You can substitute bacon for salt pork.) Sprinkle with scallions (or green onions or chives) and salt and thyme.

Mince garlic (or use a garlic press) and add to skillet.

Cook, stirring often, until pork and salt pork are nicely browned. Add mushrooms in their liquid and bring to boil.

Then add halved, seeded green pepper and rice that has been rinsed in cold water.

Cover and cook over low heat, stirring occasionally with fork, for 15 minutes or until all liquid is absorbed.

Slice frankfurters, add to rice mixture and cook, uncovered, one minute to heat franks.

Makes four to six servings.

The English, looking for sunnier spots, think in terms of southern Spain, Italy — and even Egypt, whence comes our next recipe.

### EGYPTIAN POT ROAST

- 1 to 1½ lb. whole green beans
- 2 lb. small potatoes
- 1 eggplant (1 to 1½ lb.)
- About 1½ lb. long, thin Zucchini
- Clove of garlic
- 1 boned, rolled leg of lamb (6 lb. before boning and rolling)
- 2 tsp. salt
- ¼ tsp. pepper
- 2 tsp. salt
- ¼ tsp. pepper
- ¼ tsp. garlic salt
- Paprika
- 2 onions, sliced
- 3 medium ripe tomatoes

In one inch boiling, salted water, cook beans five minutes. Drain, measure liquid; add water to make 2½ cups. Start heating oven to 375 degrees. Pare potatoes. Cut eggplant into ½ inch slices, pare and cut into quarters. Cut zucchini into ½ inch slices.

Next, with cut clove of garlic, rub lamb on all sides; sprinkle with 2 tsp. salt and ¼ tsp. pepper. Place lamb in centre of large, shallow, open pan.

Arrange potatoes, beans, eggplant and zucchini around meat, making two piles of potatoes and one of each of others.

Sprinkle vegetables with 2 tsp. salt, ¼ tsp. each pepper and garlic salt. Sprinkle potatoes well with paprika. Pour bean liquid into pan and place onions on top of meat and vegetables.

Cut tomatoes into quarters and squeeze juice over the meat and vegetables; discard pulp.

Bake, uncovered, for 2½ hours, frequently basting with pan juices.

Place meat on large platter; partly sliced. Arrange vegetables around meat. Thicken pan juice and pass.

Makes six servings.

## FASHION FILE

By RUSTY CROWLEY

THE CURRENT FASHION PICTURE WOULD NOT BE complete without a discussion on pants. They are important enough and controversial enough that like hemlines you have to take a stand somewhere.

Pantsuits are the rage south of the border and for spectator sportswear they are just great. In dressy fabrics from lace to lurex they are also good for hostess and party wear.

Granted there is still resistance to them in some quarters such as better restaurants where they are banned, but they are important enough as a trend to be a wardrobe must.

A more fluid version of the pant is the culotte suit or culotte gown. In essence, these are split skirts which only show their secret when the wearer becomes particularly active.

CULOTTES ARE DIFFICULT TO CUT TO MAKE. They hang well, especially in a short length and the culotte suit has run into some criticism from the rear.

One designer has styled her skirts so the culotte split appears only in the front, in hopes of forestalling any undesirable rearward attack.

Newest on the pant scene are the so-called mini-pants which are, in my opinion, a fashion disaster but which are being hounded about enough to be in danger of becoming a fad.

The ones I've seen are about the length of a long-line panty girdle distinctly worn for visibility under the short skirts.

Hopefully they will be confined to the very, very young but even this is open to question. Some are being made in lace or banded in jewels which presupposes a more sophisticated clientele than the lollipop set.

WE HAD A FAD A FEW YEARS AGO WHEN FRILLED petticoats were worn an inch below the hemline. You can see it in the old Roz Russell movie "The Women". This style scarcely lasted long enough for them to finish the film because basically it offended. If history repeats itself, this mini-pant routine won't last either, for the same reason.

All this frantic in pants stems from the high rise hemlines necessitating some kind of cover-up.

Many designers have indicated they are working on new styles to lengthen the hemline but so far have failed to produce.

Right now no one is talking anything but short skirts, short being at least an inch above the knee and preferably two. If you are a real sport you can wear them as much as six inches above.

I agree some coverup is necessary but pants worn to show below a skirt seems to be reaching a little. Why not panty hose? They can give you a nice leggy look while protecting you from the draft.

The latest idiosyncrasy to be pictured is a mini-mini skirt (would you believe cocktail apron length?) worn over full length slacks.

It grieves me to see new fashion trends which stretch my credibility to the breaking point. It's gotten so I'm afraid to ask what else is new.

LEIGH HODGSON  
... missing this area since Jan. 10th

## Have you seen Leigh Hodgson

Denis Leigh Hodgson aged 18 years, has been missing in this area since January 10th.

Leigh is six foot two in height, weighs two hundred pounds and has brown hair and blue eyes. When he left home he was wearing a brown reversible jacket, blue jeans, a black shirt and brown oxfords.

Other identification is a scar on his right instep. Anyone knowing his whereabouts is asked to call YU8-7276. If no answer call Mrs. Hodgson at YU8-5267.

Leigh left home at noon and his car ran off the road north of Whistler Mountain that afternoon about 4 or 4:30. He was picked up walking towards Pemberton a short distance from his car.

Mel Swanson picked him up, took him to Milieu's logging camp and then back to the B.A. service station at Whistler Mountain where he asked the station attendant for help to get his car out.

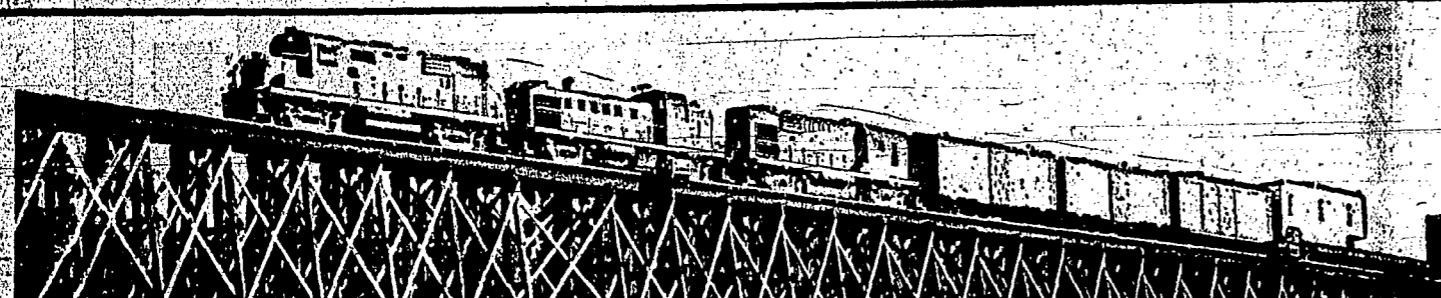

He was told the tow truck was not operating and the youth left the service station. This was the last time the boy was seen.

R.C.M. Police in Squamish are making inquiries concerning his disappearance, but to date no traces of him have been found.

## THE VITAL LINK!

Mountains or muskeg, the rich loam of the Peace, dense forest, or the rolling rangeland of the Cariboo... Pacific Great Eastern trains link the Northern Interior of British Columbia with the markets of the world. Millions of dollars have been invested in the north to harvest the rich resources of minerals and timber. The forests produce lumber, sawn products and high-grade pulp. The vast area is the scene of metals, oil and natural gas development. The fertile valley of the Peace produces some of the

finest grain in the world, and the beef of the Cariboo is marketed across the nation. All these industries ship their goods to market by P.G.E. freight. The P.G.E. brings them the materials they need and takes their production out. Lumber, beef, grain, sulphur, ore... the North produces them all — and the world buys them. The P.G.E. is the vital link between the Northern Interior and the markets of the world.

## Card of Thanks

We would like to thank all our friends for their kind expressions of sympathy at the death of our father "Sandy" Fowler.

Special thanks to Rev. Denis Harris, Dr. L. C. Kindree, the pall-bearers and all his many neighbors and friends.

The Fowler family

## Card Of Thanks

Bob and I would like to thank our friends and relatives for all they did for us for Darlene's wedding.

Thank you so much.

Bob, Hazel and family.

## scrupulous!

Did you read our ad in last week's paper... What did "scrupulous baking" mean?

We don't know, and neither does Hoodspith the printer (the stupid S.O.B.).

But we know the "scrupulous" means "scrumptious" and so does Hoodspith (he eats our bread).

Could it be that he has coined a new word?

By the way — have you tried our scrupulous Baked Goods?
